

# MANGALORE REFINERY AND PETROCHEMICALS LIMITED (MRPL)

SUSTAINABILITY  
REPORT **FY 2023-24**

# Fueling India's Sustainable Energy Vision

Mangalore Refinery and Petrochemicals Limited (MRPL's) first Sustainability Report for FY 2023-24 is on a theme that aligns with our core mission: 'Transitioning to Sustainable Future.'

## A Legacy of Responsibility and Innovation

MRPL has long been an integral part of India's energy sector, contributing significantly to the country's energy security and economic growth. Over the years, MRPL have recognized the pressing need to transform our operations to meet the evolving demands of sustainability. Our legacy is one of responsibility and innovation, where every step forward is taken with the foresight of its impact on future generations.

## Strategic Pillars of Sustainability

### Environmental Stewardship

At the heart of our sustainability efforts is our unwavering commitment to reducing our environmental footprint. This report highlights our advancements in low-carbon transition integration, such as the substantial generation of solar power and the optimization of energy use across our operations. These initiatives are part of a broader strategy to mitigate greenhouse gas (GHG) emissions and enhance resource efficiency.

### Social Responsibility

Beyond environmental and economic aspects, our sustainability framework is deeply embedded in social responsibility. MRPL is committed to fostering inclusive growth by supporting local communities, promoting diversity within our workforce and ensuring the highest standards of health and safety. Our community engagement programs, focused on education, health and infrastructure, are tailored to uplift the regions where we operate.

### Governance and Ethical Leadership

Sustainability for MRPL is also about robust governance and ethical leadership. With strong framework led by the Board of Directors and Departments, we prioritize transparency, accountability, strategic oversight and compliance with stringent environmental regulations. Guided by policies like the Whistleblower Policy and Enterprise Risk Management framework, we integrate sustainability into decision-making, aligning global standards to foster ethical practices and ensure long-term stakeholder value.

## Innovative Approaches to Sustainable Challenges

MRPL's approach to sustainability is marked by innovation and forward thinking solutions. We are exploring the potential of green hydrogen, advanced biofuels and other emerging technologies to diversify our energy mix and reduce dependency on fossil fuels. Our research and development efforts are geared towards finding sustainable solutions that can be scaled across the industry, setting new benchmarks for environmental performance.

## Engaging Stakeholders for a Shared Vision

A critical component of our sustainability journey is stakeholder engagement. We believe that meaningful progress can only be achieved through collaborative efforts. By engaging with our stakeholders—ranging from local communities to global partners—we aim to build a shared vision of sustainability that aligns with both local and international objectives.

As we chart our course towards India's 2070 Net-Zero target, MRPL is committed to achieve Net-Zero emissions by 2038 and focus on continuous improvement and innovation. This report is a testament to our strategic initiatives and the measurable progress we have made. However, we recognize that the journey ahead is long and requires sustained effort and collaboration.

Looking Ahead: MRPL's Net-Zero emissions roadmap to **2038** aligns with parent company ONGC

Our future initiatives will focus on enhancing our sustainability metrics, investing in green technologies, and fostering a culture of sustainability within and beyond our organization. By doing so, we aim to not only meet but exceed our sustainability targets, ensuring a resilient and prosperous future for all.

# About the Report

## Reporting Principles

This report has been developed with reference to the Global Reporting Initiative (GRI) standards for sustainability reporting, including GRI 11: Oil and Gas Sector standards, and aligns with the United Nations Global Compact (UNGC) framework.

## Reporting Scope and Boundary

This report details our sustainability approach across the three pillars of environmental stewardship, social responsibility and governance and ethical leadership for the period from April 1, 2023 to March 31, 2024. The report covers our non-financial performance across both the refinery and petrochemical operations and Indian offices of Mangalore Refinery and Petrochemicals Limited (MRPL), excluding joint ventures (JVs).

## Report Content

This is MRPL's first sustainability report and is designed to communicate our annual sustainability commitments and performance in a structured and transparent manner to a wide range of stakeholders, including investors, shareholders, customers, suppliers, employees, communities and the government.

## Contact Details and Feedback

We invite feedback on our report to help us stay on track in providing relevant information to our readers and stakeholders in a clear and accessible manner. For any queries, suggestions, or comments, please share your thoughts at [sustainabilityreporting@mrpl.co.in](mailto:sustainabilityreporting@mrpl.co.in)

## Forward-looking Statement

This report contains forward-looking statements regarding future expectations, historical data and forecasts. It also includes predictions and data related to these forecasts, as well as projections and statements about potential future events. These statements pertain to MRPL's financial health, operational results, business activities and goals for the future.

Forward-looking statements may include words such as 'plan,' 'anticipates,' 'expect,' 'is expected to,' 'shall,' 'should,' 'aim,' 'intends,' 'is likely to,' 'believes' or similar expressions. Some statements may relate to the Company's purpose, values, ambition, aims, objectives and targets. This also includes statements related to expectations for MRPL's strategy to achieve Net-Zero emissions by 2038.

It is important to note that actual results may differ from the forecast, as with all forward-looking statements. While we strive to provide accurate, complete and timely information in our forward-looking statements and those obtained from third parties, we acknowledge that certain factors beyond our control may impact their precision or timelines. Therefore, readers should exercise caution when considering this information. We do not undertake any obligation to publicly update any forward-looking statements, whether due to new information, future events or other factors.

## Disclaimer

*The data presented in the report has been internally verified, as independent assurance.*

# Message from the Managing Director & Chief Executive Officer

**Dear Stakeholders,**

It is with immense pride that I present MRPL's maiden Sustainability Report for FY 2023-24. This report represents a pivotal moment in our organization's journey, underscoring our commitment to embedding sustainability as a fundamental principle guiding our operations and strategy. At MRPL, we drive innovation, collaboration and our commitment to a resilient and inclusive future. Our strategic initiatives over the years have laid a solid foundation for the progress we showcase today. While the report represents our first step in publicly sharing our sustainability journey, sustainability has long been at the heart of our core business strategies, guiding our decision-making across all functions. Our report aligns with the latest GRI standards, underscoring our dedication to global best practices in sustainability reporting.

As a key contributor to India's energy landscape, MRPL remains steadfast in its efforts towards supporting the nation's transition towards a sustainable energy future. The theme of our inaugural report, 'Fueling India's Sustainable Energy Vision,' reflects our alignment with India's ambition of achieving Net-Zero by 2070, and the strategic priorities of our parent company, ONGC. In line with these goals, MRPL has charted a clear and actionable roadmap to achieve Net-Zero emissions by 2038.

India's oil and gas sector plays a critical role in addressing the nation's energy security needs while aligning with its ambitious climate and sustainability goals. As one of the largest global energy consumers, India is accelerating its transition to Net-Zero emissions. This transition is central to our strategy, presenting a unique opportunity to innovate and lead in the global energy landscape. We are embracing this opportunity by actively investing in renewable energy, low-carbon technologies and circular economy solutions. These initiatives not only shape a sustainable future but also drive growth. Our strategic projects, such as the development of a bio-aviation turbine fuel (Bio-ATF) demonstration plant, scheduled to be operational by 2027, highlight our commitment to clean energy solutions. Similarly, our investments in green hydrogen, including an ongoing small-scale project, are pivotal in advancing India's renewable energy landscape. By diversifying our energy portfolio to include solar energy, we are ensuring our readiness for the future energy landscape. We are also focusing on reducing our Scope 1 emissions through improved operational efficiency, aiming for a 20-25% reduction in CO<sub>2</sub> emissions by 2030. These strategic initiatives allow us to capture opportunities while mitigating risks associated with a conventional business model, positioning MRPL as a leader in the transition to sustainable energy.

MRPL's role in the global oil and gas sector extends beyond the production of high-quality petroleum products and petrochemicals. Operational excellence remains central to our efforts, driving innovation and efficiency in all aspects of our operations, such as co-generation, process optimization and fuel substitution. Our commitment to sustainable resource management is reflected in our investments in desalination and treated municipal sewage water systems, which have enabled us to meet 50-60% of our peak water requirements.

We are committed to minimizing our environmental footprint through a multi-faceted approach. We are continually working to enhance green cover in and around the refinery complex. We are transitioning 50% of our power demand to the grid, prioritizing green energy to minimize in-house fossil fuel-based generation. Further, we are collaborating with our parent company, ONGC to explore investment opportunities in renewable energy initiatives.

Innovation is a key driver in our pursuit of circularity. MRPL has filed four patents on various de-polymerization technologies providing a groundbreaking solution for plastic waste management, turning challenges into opportunities. With the waste PET plastic depolymerization demonstration plant set for commissioning by 2025, this initiative will strengthen MRPL's leadership in addressing pressing environmental concerns. Sustainability at MRPL extends beyond environmental responsibility to the well-being of our employees, contract workers and the communities we serve. Diversity and inclusion are integral to our corporate culture, and we are committed to fostering an inclusive workplace that values diverse perspectives and talents. We have also invested significantly in training programmes focused on the latest technologies, human rights, health and safety-related aspects and environmental awareness.

Over the past five years, we have invested more than INR 200 Crore in community development initiatives, positively impacting approximately 20,000 lives. These programmes, focusing on education, healthcare and cultural preservation, reflect our unwavering commitment to empowering communities and fostering socio-economic growth.

At MRPL, we firmly believe that strong business ethics are the foundation of our operations and decision-making process. Robust governance underpins our sustainability efforts, with a dedicated CSR Committee overseeing project implementation and Board-level reviews ensuring alignment with our sustainability objectives. Our integration of R&D, manufacturing and marketing with environmental responsibility exemplifies our holistic approach to sustainability.

Over the past year, we have made significant strides in embedding ESG principles into the core of our corporate culture, transforming sustainability from a priority to a fundamental value. This shift has enhanced our operational resilience and driven long-term value creation for our stakeholders. While we take pride in our achievements, we are mindful of the challenges ahead and remain committed to continuous improvement and innovation.

Looking forward, we are focused on deepening the integration of ESG into our operations by investing in sustainable technologies and fostering a culture of sustainability across all levels. By embracing emerging technologies, driving innovation and embedding resource efficiency across our operations, we aim to set new benchmarks for sustainable growth in the industrial sector. With our focus on collaboration and shared success, we are confident in our ability to lead with purpose and create a lasting positive impact.

I extend my deepest gratitude to our employees and other stakeholders for their trust and support in this transformative journey. Your dedication strengthens our resolve to achieve greater heights and reinforces our commitment to building a legacy of sustainability, innovation and shared progress. Together, we are shaping a future that reflects our values and delivers lasting benefits to all.

Thank you for your continued support and trust in MRPL.

---

Warm regards,

**Shri Mundkur Shyamprasad Kamath**

Managing Director & Chief Executive Officer

# ESG Highlights

## Key ESG Highlights FY 2023-24

Energy intensity: **68.10 GJ/INR million** of revenue and **4.33 GJ/MT** of crude processed

Power generated from solar/renewables: **53,682 GJ**

Energy savings achieved– **1.48 Mn GJ** through energy conservation and efficiency initiatives

Waste diverted from disposal: **65%**  
**55,812 tonne** of slop oil recovered

Water intensity: **1.45 kL/MT** of crude processed  
Desalination plant capacity increased to **40 MLD**  
Treated **3.6 MGD** of municipal STP water

GHG emission Scope 1: **5.5 million tCO<sub>2</sub>e**  
Scope 2: **0.15 million tCO<sub>2</sub>e**  
Emission intensity: **5.39 tCO<sub>2</sub>e/INR million** of revenue and **0.34 tCO<sub>2</sub>e/MT** of crude processed  
Reduction in GHG emission: **1.34 lakh tCO<sub>2</sub>e** from RE shift, energy efficiency and green belt development

Total CSR spend: **INR 20.48 Crore** and  
No. of beneficiaries: **Over 18,762**

Total Workforce: **2,548**

Gender diversity amongst employees and workers: **8.99%**

Gross Turnover: **INR 1,05,190 Crore**  
& PAT (Profit After Tax): **INR 3,596 Crore**

Throughput achieved **16.53 million MT**

MRPL HiQ - **100<sup>th</sup>**  
Retail outlet commissioned

Procurement from MSMEs: **34.20%**

**Zero incidents** of security/cyber breaches

**Zero incidents** of Human Rights violations

Total training hours: **~55,000 hours**

Lost Time Injury Frequency Rate (LTIFR) **0.08 per million hours** worked

SOCIAL

ECONOMIC

# Awards, Accolades, and **Appreciations**

MRPL's commitment to sustainability and excellence in Environmental, Social and Governance (ESG) practices has been recognized through numerous awards and accolades. These honors reflect our dedication to innovation, best practices and leadership in sustainability.

## Recognitions Won in FY 2023-24

### Environmental Awards

- **Global Water Management and Conservation Company of the Year 2023:** This award was bestowed upon MRPL for our outstanding water management practices, including the operation of our desalination plant and the innovative use of treated municipal sewage water.
- **Greentech International EHS Award 2023:** This award recognizes MRPL's excellence in Environmental, Health, and Safety standards and underscores our commitment to maintaining high environmental standards and workplace safety.

### Social Responsibility and Community Engagement

- **PRSI National Awards:** MRPL has been honored with three PRSI National Awards in the categories of social media for PR & Branding, Best CSR Project for child care, and best skill development program. These awards recognize our excellence in leveraging social media for effective public relations and branding, our impactful CSR initiatives focused on childcare, and our outstanding efforts in skill development programs.
- **Outstanding Efforts in Empowering Women:** MRPL's Women In Public Sector (WIPS) chapter has earned second place among Miniratna Central Public Sector Enterprises (CPSEs) for its exemplary initiatives in empowering women within the organization. This recognition highlights our commitment to gender equality and the promotion of women's advancement in the workplace.

### Occupational Health and Safety

- **Grow Care India Occupational Health and Safety Platinum Award 2023:** MRPL's robust health and safety practices were recognized with this award, highlighting our commitment to ensuring a safe working environment for all employees.

## Innovation and Technology

- **Best Innovation in Refinery Award (Energy Technology Meet 2023):** This prestigious award acknowledges MRPL's significant advancements and creative solutions in refining technology. The recognition highlights our commitment to innovation, efficiency, and excellence in the energy sector, showcasing our role in driving progress and setting benchmarks in refinery operations.
- **Government e-Market (GeM) Star Buyer Award.:** This accolade recognizes MRPL's outstanding performance and efficiency in utilizing the GeM platform for procurement activities. The award highlights our commitment to transparency, efficiency, and best practices in its purchasing processes.
- **First Prize in Best Cogen Boiler State Level Award:** This award recognizes MRPL's innovative approach to improving operational efficiency through the use of cogeneration technology in boilers. The achievement demonstrates the company's commitment to optimizing energy use, reducing operational costs, and contributing to environmental sustainability through advanced technological solutions.
- **Dun & Bradstreet Award:** This esteemed recognition highlights MRPL's exceptional performance and excellence among Miniratna companies, a classification for public sector enterprises in India with a commendable track record. The award underscores our achievements in operational efficiency, innovation, and management practices, distinguishing the Company as a leading entity in its category.

## Certifications

MRPL is the first Indian refinery to receive the AS9100 certification, the international quality management standard for the aerospace industry. This achievement demonstrates our commitment to the highest standards of quality, safety, excellence, and reliability in our operations. It also underscores our ability to meet stringent industry standards, further enhancing our reputation and operational excellence in the global market.

**Below are the list of ISO certifications received by MRPL:**

### ISO 9001:2015

(QUALITY  
MANAGEMENT  
SYSTEM – QMS)

### ISO 14001:2015

(ENVIRONMENT  
MANAGEMENT  
SYSTEM – EMS)

### ISO 45001:2018

(OCCUPATIONAL  
HEALTH AND SAFETY  
MANAGEMENT SYSTEM  
– OHSMS)

### ISO 50001:2018

(ENERGY MANAGEMENT  
SYSTEM – ENMS)

### ISO 27001:2013

(INFORMATION  
SECURITY MANAGEMENT  
SYSTEM – ISMS)

### AS9100:D

MRPL IS THE FIRST REFINERY  
IN INDIA TO BE CERTIFIED  
WITH AEROSPACE STANDARD

# Company Overview

Mangalore Refinery and Petrochemicals Limited (MRPL) is a Category 1 Miniratna Central Public Sector Enterprise (CPSE) under the Ministry of Petroleum and Natural Gas, Government of India. Situated in the scenic hilly terrain north of Mangaluru city in the Dakshina Kannada District of Karnataka, India, MRPL operates a 15.0 MMTPA (Million Metric Tonne per Annum) refinery. The refinery's versatile design with advanced secondary processing units enables the production of an extensive range of high-quality products, with a focus on energy efficiency and reduced environmental impact. The company's product portfolio is broadly categorized into fuel-based and non-fuel-based products. The fuel-based products include Liquefied Petroleum Gas (LPG), Motor Spirit (MS-VI and MS 95 RON), Reformate, Superior Kerosene Oil (SKO), High-Speed Diesel (HSD), High Flash High-Speed Diesel (HFHSD), Marine Fuel Oil (MFO), Furnace Oil (FO), Aviation Turbine Fuel (ATF) and Petroleum Coke. The non-fuel products comprise Polypropylene (PP), Xylol, Naphtha, Mineral Turpentine Oil (MTO), Vacuum Gas Oil (VGO), Bitumen, Sulphur, Paraxylene, Benzene and Heavy Aromatics.

## Our Journey

Our progress over the past four decades has been defined by every step we have taken along the way.

## Vision

**'To be a world-class Refining and Petrochemicals Company, with a strong emphasis on Productivity, Customer Satisfaction, Safety, Health and Environment Management, Corporate Social Responsibility and Care for Employees'.**

Sustainable leadership energy conservation, efficiency, productivity, and innovation

Emerging opportunities of capitalization in domestic and international market

Strive to meet customer requirements to their satisfaction

Maintain global standards of health, safety and environmental standards and strong commitment towards community welfare

Constant focus on employee welfare and employee relations

Adopt the highest standards of business ethics and values

## Our Shareholders

Mangalore Refinery and Petrochemicals Limited (MRPL) is primarily owned by Oil and Natural Gas Corporation Limited (ONGC), which holds a 71.63% stake, followed by Hindustan Petroleum Corporation Limited (HPCL) at 16.95%, with the remaining 11.42% distributed among public holdings, institutions and corporate bodies. As strategic partners, ONGC and HPCL play a pivotal role in driving MRPL's efforts toward achieving its climate goals by leveraging their expertise in sustainable energy and operational excellence.

### Shareholding Pattern as on March 31, 2024

### Joint Venture with Shell

Shell MRPL Aviation Fuels and Services Limited (SMA)<sup>1</sup>, a 50:50 joint venture between MRPL and Shell B.V. (a step-down subsidiary of Shell Plc) supplies aviation turbine fuel (ATF) to both domestic and international airlines. SMA sources ATF from the MRPL Refinery Complex and supplies it to various airports, including Bengaluru, Goa, Mangaluru, Hyderabad, Chennai, Calicut, Madurai, Trichy, Coimbatore, and Kannur, facilitating the fueling needs of Indian carriers across international airports.

**Shell MRPL Aviation**

<sup>1</sup><https://shellmrpl.co.in/>

## Market Presence

We are currently operating in four states—Karnataka, Kerala, Tamil Nadu, and Maharashtra—as well as in one Union Territory, New Delhi. Our products are distributed in 27 countries internationally and across 17 states and five Union Territories in India in FY 2023-24.

## India market presence

MRPL proudly serves its products across 17 states and five union territories in India. This extensive reach highlights our commitment to delivering quality and reliability nationwide. With a strong presence, MRPL continues to meet the diverse needs of our customers across the country.

In addition to our core refining business, we have expanded into retail, addressing transportation fuel needs in Karnataka and Kerala. We are also expanding our retail presence in the neighboring states of Andhra Pradesh, Tamil Nadu and Telangana.

## HiQ – 'High Quality' Fuels and Services

## Financial Highlights

During FY 2023-24, MRPL achieved a turnover of **INR 1,05,190 Crore**, compared to **INR 1,24,686 Crore** in FY 2022-23. Despite the decrease in turnover, our Company earned a Profit After Tax (PAT) of **INR 3,596 Crore** for FY 2023-24, which is an increase from a PAT of **INR 2,638 Crore** earned in FY 2022-23

## Board of Directors

The Board of Directors at MRPL as on March 31, 2024 were as follows:

### MRPL Board of Directors

**Shri Arun Kumar Singh**

Chairman  
Non-executive Director  
(ONGC Nominee)

**Shri Mundkur Shyamprasad Kamath**

Managing Director &  
Chief Executive Officer

**Shri Sanjay Varma**

Director (Refinery)

**Shri Vivek Chandrakant Tongaonkar**

Director (Finance)

**Shri Pankaj Kumar**

Non-executive Director  
(ONGC Nominee)

**Shri S. Bharathan**

Non-executive Director  
(HPCL Nominee)

**Shri Dheeraj Kumar Ojha**

Non-executive Director  
(Government Nominee)

**Shri Rajinder Kumar**

Non-executive Director  
(Government Nominee)

**Shri Rajkumar Sharma**

Non-executive  
Independent Director

**Shri Pankaj Gupta**

Non-executive  
Independent Director

**Shri Manohar Singh Verma**

Non-executive  
Independent Director

CHAIRMAN  
DIN: **06646894**

### SHRI ARUN KUMAR SINGH

Shri Arun Kumar Singh, Chairman of ONGC, holds a Mechanical Engineering degree from NIT Patna and has over 36 years of experience in the Oil and Gas industry. He previously served as Chairman and MD of BPCL, a Fortune Global 500 company, and chaired Indraprastha Gas Ltd. Mr. Singh also served on the Board of Petronet LNG Ltd. and worked as President (Africa and Australia) at Bharat Petro Resources Ltd., focusing on international oil and gas exploration.

DIRECTOR – REFINERY  
DIN: **05155972**

### SHRI SANJAY VARMA

Shri Sanjay Varma, a Mechanical Engineer, has over 35 years of expertise in the Oil and Gas sector, excelling in operations, projects, materials, and HSE management. Since joining MRPL in 1993, he has played a key role in major refinery phases and led its transformation as Director-Refinery since 2020. Under his leadership, MRPL achieved record-breaking performance, expansion, and energy transition goals, becoming India's largest single-site Oil PSU in FY 2022-23.

MANAGING DIRECTOR &  
CHIEF EXECUTIVE OFFICER  
DIN: **10092758**

### SHRI MUNDKUR SHYAMPRASAD KAMATH

Shri Mundkur Shyamprasad Kamath has over 30 years of experience in the downstream hydrocarbon industry, holding a Bachelor's in Chemical Engineering from MIT Manipal and a PG Diploma from TA Pai Management Institute. As Executive Director at MRPL, he led operations, maintenance, and production planning, with a focus on energy conservation and digitalization. He has advanced refinery operations by integrating AI and ML technologies, driving sustained growth and innovation in the industry.

DIRECTOR – FINANCE  
DIN: **10143854**

### SHRI VIVEK CHANDRAKANT TONGAONKAR

Shri Vivek Chandrakant Tongaonkar, an engineering graduate from COEP and MBA (Finance) from Symbiosis, has 36 years of diverse experience in the E&P value chain. Starting with ONGC in 1987, he excelled in offshore engineering before transitioning to finance, where he led key areas like accounts, investments, marketing, taxation, and strategy. As ONGC CFO (2021), he centralized forex procurement, achieving savings, and ensured seamless operations during COVID. He also held roles like Executive Director – Chief Corporate Finance and Chief Offshore Finance in Mumbai.

ONGC NOMINEE  
DIRECTOR  
DIN: **09252235**

### SHRI PANKAJ KUMAR

Shri Pankaj Kumar, a Chemical Engineering graduate from IIT Roorkee and a Master's degree holder from IIT Delhi, has over 35 years of experience in the Oil and Gas industry. He has completed advanced leadership programs at IIM Bangalore and IIM Calcutta. Shri Kumar serves as Director on the boards of ONGC subsidiaries and joint ventures, including HPCL and ONGC Petro Additions Ltd. OPaL, and chairs Petronet MHB Ltd. He has also contributed significantly to ONGC's Long Term Growth Strategy 2040.

GOVERNMENT  
NOMINEE DIRECTOR  
DIN: **09639759**

### SHRI DHEERAJ KUMAR OJHA

Shri Dheeraj Kumar Ojha, an Indian Statistical Services officer from the 1999 batch, has served in various ministries and joined the Ministry of Petroleum and Natural Gas in December 2021. He specializes in developing IT-enabled systems for project implementation and monitoring, with over 10 years of experience in infrastructure projects. Certified in Project Management (CIPM), he has authored over 15 research articles. Shri Ojha has received honors, including an Honorary Fellowship from CEPM and the Digital India 2020 award for digitalizing health sector data.

HPCL NOMINEE DIRECTOR  
DIN: **09561481**

### SHRI S. BHARATHAN

Shri S. Bharathan, Director – Refineries at HPCL, has over 25 years of experience in refinery operations at the Mumbai and Visakh refineries. He has also spent four years in the Corporate Office, focusing on Margin Management and Refinery Projects. As head of HPCL's Green R&D Centre, he has overseen the filing of around 380 patents. Additionally, he served as Executive Director – Refineries Coordination, with responsibilities in R&D.

GOVERNMENT NOMINEE  
DIRECTOR  
DIN: **09651096**

### SHRI RAJINDER KUMAR

Shri Rajinder Kumar, Economic Adviser (IFD) at the Ministry of Petroleum and Natural Gas, holds an M.Sc. in Economics, an M. Phil in Public Policy, and various diplomas in management, international law, and public administration. With over 20 years of experience across Indian ministries, he has held key roles, including Financial Advisor at Bhakra Beas Management Board and Director at the Ministry of Defence. Shri Kumar has also served on the Board of Balmer Lawrie & Co. Limited.

### SHRI RAJKUMAR SHARMA

Shri Rajkumar Sharma, a Commerce and Law graduate, is a Fellow Member of the Institute of Company Secretaries of India and has been practicing as a Company Secretary in Guwahati since 1997. He specializes in income tax and company law matters, including mergers and restructuring. He has served as Chairman of the North-East Chapter of ICSI and Secretary of the Tax Bar Association in Assam. Shri Sharma was an Independent Director at Numaligarh Refinery Ltd. and is an active speaker on income tax and company law topics.

GOVERNMENT NOMINEE  
DIRECTOR  
DIN: **01681944**

### SHRI PANKAJ GUPTA

Shri Pankaj Gupta, with degrees in Commerce and Law, practices Civil and Revenue law at the District Collectorate in Etah. He is also actively engaged in social service activities.

INDEPENDENT DIRECTOR  
DIN: **09393633**

### SHRI MANOHAR SINGH VERMA

Shri Manohar Singh Verma, with Bachelor's and Master's degree in Civil Engineering focused on Water Resources, started his career as a Lecturer and Associate Professor before joining the Madhya Pradesh State Police Service in 1989. He became an Indian Police Service (IPS) officer in 2003, serving as Superintendent of Police and Deputy Inspector General in various regions until his retirement in June 2020. He has received the Police Medal for Meritorious Service (2009), the Police Medal for Gallantry (2011), and the Simhastha Jyoti Medal for his role in the Simhastha 2016 event.

INDEPENDENT DIRECTOR  
DIN: **09393215**

# Sustainability at **MRPL**

At MRPL, we understand that climate change presents both challenges and opportunities. As a responsible corporate entity, we have made sustainability an integral part of our operations and business strategy. Our commitment to driving energy transition and environmental resilience is embedded in every aspect of our decision-making and operational processes.

We are focused on leading actions that contribute to the global goal of reducing carbon emissions, transitioning towards renewable energy and fostering long-term environmental sustainability. This includes initiatives in renewable energy projects, green hydrogen production, water conservation and waste management. Our journey towards sustainability is guided by a vision of building a resilient business that aligns with the principles of sustainable development while creating long-term value for all stakeholders.

## Our Approach to Sustainability

MRPL's sustainability journey is guided by three interconnected pillars, forming a holistic framework to navigate the complexities of the energy transition while delivering value to all stakeholders. These pillars embody our commitment to minimizing environmental impacts, fostering inclusive growth and upholding the highest standards of transparency and accountability. Guided by these principles, we strive to integrate sustainable practices into every aspect of our operations. Aligning with national priorities and global commitments while contributing meaningfully to the communities and ecosystems in which we serve. These pillars are not just strategic priorities but are embedded in our ethos, driving us to create lasting value and resilience for all our stakeholders.

## Environmental Stewardship

We have embarked on an ambitious agenda to reduce our environmental impact across every facet of our operations. Our approach is focused on:

- **Energy Transition:** MRPL is leading the way in adopting cleaner energy alternatives. We are making significant investments in renewable energy, including solar power, and are actively working on green hydrogen projects. This is just one part of our broader roadmap to decarbonize our operations and reach our goal of achieving Net-Zero emissions by 2038.
- **Water and Waste Management:** We are committed to minimizing our water footprint and ensuring responsible water usage through our desalination plants, water recycling initiatives, and condensate recovery units. Our waste management strategies focus on achieving zero-waste-to-landfill status, and we have already succeeded in recycling hazardous wastes through innovative solutions.
- **Biodiversity Conservation:** MRPL is committed to protecting and enhancing biodiversity around our operational areas. Our efforts in FY 2023-24, include the plantation of 6,545 tree saplings and a 25-acre afforestation initiative in collaboration with the Karnataka Forest Department, demonstrate our commitment to preserving ecological habitats. Also, in collaboration with the Pilikula Development Authority, we are actively engaged in planting threatened and endangered species native to Western Ghat across 50-acres of area.

Learn more about our environmental conservation efforts on page 29 and 42.

## Social Responsibility

Sustainability is not only about the environment but also about ensuring equitable social development. MRPL actively engages with communities, employees, and stakeholders to ensure that our operations contribute positively to society:

- **Community Engagement:** MRPL engages with local communities through quarterly meetings, focusing on raising environmental awareness and contributing to community welfare. We also run initiatives aimed at educating the marginalized and vulnerable groups.
- **Employee Well-being:** Our employees are at the core of our operations, and we ensure their well-being through regular engagement, career development programs, and a focus on health and safety.

Read more about our contributions to the society on page 43.

## Governance and Ethical Leadership

Our sustainability efforts are overseen by a governance structure that ensures compliance with environmental regulations and promotes ethical leadership. MRPL is certified with ISO 9001:2015, ISO 14001:2015, ISO 45001:2018, and ISO 50001:2018, reflecting our commitment to maintaining global standards in quality, environmental, energy, and occupational health and safety management. Our governance framework is further reinforced by the active involvement of the Board of Directors and its seven sub-committees. These committees, while focused on diverse operational and strategic areas, including Audit, Risk Management, Project Appraisal and Corporate Social Responsibility, indirectly support our sustainability agenda through their recommendations and oversight. This integrated and structured approach strengthens our ability to embed sustainability considerations into key decision-making processes and uphold high standards of accountability and transparency.

### Our Vision for the Future

At MRPL, we are determined to lead the charge in sustainable energy solutions. By aligning our operations with global sustainability goals, we aim to not only minimize our environmental impact but also create lasting positive change for the communities we serve. Our long-term sustainability vision is to become a Net-Zero emissions organization by 2038, leveraging innovative technologies, fostering partnerships, and enhancing our environmental, social, and governance performance.

**Sustainability is not just a goal for MRPL—it is a journey, a commitment, and a responsibility.**

# Stakeholder Engagement and **Materiality Assessment**

At MRPL, stakeholder engagement is integral to our sustainability strategy, ensuring that our actions align with the expectations and needs of those who contribute to and are impacted by our operations. We understand that our success is deeply tied to the trust and collaboration of our stakeholders- employees, shareholders/ investors, customers, local communities, suppliers and regulatory bodies. By fostering collaborative relationships built on transparency, mutual respect and shared goals, we create a foundation for long-term value creation.

Our engagement process is guided by international best practices, including GRI standards, facilitating meaningful dialogue and gathering actionable feedback. These interactions not only strengthen our relationships but also enhance our ability to address key sustainability challenges effectively.

Through structured mechanisms such as public consultations, surveys, regular meetings, structured feedback channels and collaborative initiatives, we ensure open dialogue and two-way communication. The feedback gathered from stakeholders is systematically analyzed and integrated into our decision-making processes. This proactive approach informs our materiality assessment, shaping our focus areas and enabling us to prioritize key sustainability issues effectively. This collaborative approach ensures that our decisions are aligned with stakeholder expectations while addressing pressing environmental, social and governance challenges.

# Stakeholder Engagement Process

Regular stakeholder engagement ensures our sustainability strategy remains responsive to stakeholder needs and regulatory expectations. As a part of engaging with various stakeholders, we also collaborate with select trade associations/industry chambers, further enabling meaningful engagement and advocacy. Our collaborations include:

- Global Compact Network India (GCNI)
- Standing Conference of Public Enterprises (SCOPE)
- Federation of Indian Petroleum Industry (FIPI)
- Confederation of Indian Industry (CII)

## Materiality Assessment

To understand and prioritize stakeholder expectations, we undertook a comprehensive materiality assessment, identifying and evaluating the most significant Environmental, Social and Governance (ESG) topics for the Company and its stakeholders. By focusing on these key ESG issues, we aim to make informed strategic decisions, manage risks effectively and enhance sustainability reporting, ultimately driving long-term value creation and ensuring resilience in a dynamic global landscape.

### Methodology Overview

Our materiality assessment follows a structured approach designed to comprehensively identify and evaluate material ESG issues. This approach considers the impact of these issues on MRPL's business objectives and associated risks, as well as critical stakeholder inputs gathered through surveys, workshops, and discussions. The assessment also aligns with leading ESG reporting standards and frameworks.

The materiality assessment process is divided into five key phases:

#### Phase I: Identification of Potential Material Topics

The first phase involved developing a comprehensive list of potential material ESG topics relevant to our Company. This was accomplished through:

- **Review of ESG Frameworks and Standards:** We conducted a thorough review of various ESG frameworks and sector-specific standards, including GRI, SASB, MSCI, and BRSR. This review ensured that the materiality assessment aligned with global best practices and covered the ESG issues most pertinent to the oil and gas sector.
- **Peer Review:** We analyzed the sustainability reports and materiality assessments of industry peers and leaders. This peer review provided insights into industry trends, common challenges, and emerging topics, ensuring our materiality assessment was both relevant and comprehensive.

Based on the review of the various ESG standards and frameworks, along with a review of peers' organizations, the 21 potential material ESG topics were identified for MRPL.

### Phase II: Identification and Prioritization of Key Stakeholders

The second phase focused on identifying and prioritizing key stakeholder groups:

- **Identification of Stakeholders:** We identified a broad range of stakeholders, including internal groups such as senior leadership, employees, and board members, as well as external stakeholders such as vendors, suppliers, NGOs, community groups, regulators, and customers.
- **Prioritization of Stakeholders:** After identifying the stakeholders, we assessed their influence on and by the Company's operations. This prioritization considered factors such as the stakeholders' ability to influence MRPL's strategic decisions and their susceptibility to being impacted by the Company's actions. This process ensured that MRPL focused its engagement efforts on the stakeholders most critical to its sustainability goals.

### Phase III: Stakeholder Engagement & Materiality Survey

We actively engaged stakeholders through in-person and online workshops to gather insights on the identified ESG material topics. During these sessions, stakeholders<sup>2</sup> were guided through the topics and then completed a structured materiality survey to rate the importance and impact of each ESG topic on a scale of low to high. The workshops ensured well-informed and meaningful survey responses, allowing us to effectively gauge the significance of each issue.

### Phase IV: Materiality Survey Analysis and Review of Business Objectives and Risks

The materiality survey responses were collected, compiled and analyzed to derive the results and then develop the materiality matrix. The materiality matrix consists of two axes – the X-axis represents the impact on the business and the Y-axis represents the impact on stakeholders.

By integrating these assessments, MRPL ensured that its materiality assessment was not only stakeholder-driven but also strategically aligned with the Company's goals and risk management priorities.

### Phase V: Materiality Matrix Development

The final phase of the materiality assessment involved synthesizing all the data and insights into a materiality matrix. This matrix visually represents the prioritization of ESG topics based on their impact on both stakeholders and our business. It serves as a strategic tool that guides our sustainability efforts by highlighting the most critical areas for action. By focusing on these prioritized issues, we can effectively balance stakeholder expectations, business objectives, and risk management considerations, thereby driving long-term value creation and sustainability.

<sup>2</sup>Stakeholders include representatives from senior leadership, employees, vendors, consultants, customers

## MRPL Materiality Assessment

ENVIRONMENT

SOCIAL

GOVERNANCE

The categorization of material topics is based on their positions relative to the impact on stakeholders and the impact on business, as depicted in the materiality matrix above. The detailed analysis of the 21 material topics with identified risks and opportunities and financial implications to address the material topics is reported in BRSR. The link to the detailed assessment is: <https://admin.mrpl.co.in/img/UploadedFiles/AnnualReport/Files/1817d38cd9bb442080a60295fd69afd3.pdf> (Page 109)

# Environmental Stewardship

At MRPL, environmental stewardship is central to our operations, driving us to balance industrial growth with ecological preservation. We have implemented initiatives across critical areas such as energy management, greenhouse gas (GHG) emissions reduction, water conservation, waste management and biodiversity preservation, ensuring that sustainability is embedded in every aspect of our business.

Our energy management efforts focus on improving efficiency and integrating renewable energy sources, such as solar power, across our facilities, to reduce energy intensity and carbon emissions, supporting our Net-Zero emissions target by 2038. Water conservation remains a critical priority, with advanced recycling systems, desalination plant and optimized effluent management ensuring responsible water usage while protecting ecosystems. Our commitment to waste management follows circular economy principles, emphasizing recycling, reuse and responsible disposal through initiatives like slop oil recovery and vermicomposting. Our continuous efforts through greenbelt development, afforestation and habitat restoration initiatives have significantly enhanced local ecosystems and community well-being.

This section offers an overview of our comprehensive environmental initiatives, highlighting MRPL's steadfast commitment to minimizing its ecological footprint while fostering sustainability and resilience.

## SDG Aligned

# Environment

At MRPL, we are dedicated to advancing our environmental sustainability agenda, recognizing the critical importance of environmental stewardship in today's global context. As a leading player in the refining and petrochemicals sector in India, we acknowledge our responsibility to mitigate our environmental footprint and drive sustainable practices across our operations. This commitment is deeply embedded in our corporate philosophy and operational strategies, aiming to balance economic growth with environmental protection.

Our strategy for managing and enhancing our environmental performance is built on the pillars of energy management, GHG emission reduction, water conservation, waste management, biodiversity preservation and strict adherence to environmental regulations. By integrating these elements into our core business processes, we strive to create value not only for our stakeholders but also for the broader ecosystem.

Our energy management initiatives focus on reducing consumption and improving efficiency through the adoption of advanced technologies and renewable energy sources. Our efforts in greenhouse gas emissions reduction are aligned with global and national targets, demonstrating our commitment to combating climate change. Water management practices at MRPL emphasize responsible usage, recycling and the implementation of innovative solutions such as desalination and the utilization of treated municipal sewage water.

Waste management is another critical area where MRPL is making significant strides. We are committed to minimizing waste generation, enhancing recycling and composting efforts and ensuring the responsible disposal of hazardous materials. Our circular economy practices aim to achieve zero-waste-to-landfill status, reflecting our dedication to sustainable resource use.

Biodiversity and ecosystem initiatives are integral to our environmental strategy. MRPL actively engages in greenbelt development to enhance the natural environment around our operations. These initiatives not only contribute to environmental preservation but also support the well-being of local communities. Compliance with environmental regulations and the pursuit of certifications and recognitions for our sustainable practices underscore our commitment to environmental excellence. We continually assess and improve our environmental management systems to meet and exceed regulatory requirements and industry standards.

## Material Topics Addressed:

## Energy Management and Efficiency

Energy management, energy efficiency and process optimization are key elements of our sustainability strategy, aimed at reducing fuel and electricity consumption. Effective energy management involves a systematic approach to monitoring, controlling and conserving energy in our facility operations, industrial processes, office buildings and transportation. At MRPL, we are focused on reducing the energy intensity to comply with regulations, achieve cost savings and enhance overall sustainability performance. In FY 2023-24, our total energy consumption stood at **71,638,375 GJ**, including **53,682 GJ** from renewable sources with an energy intensity of **68.10 GJ/INR million** of revenue and **4.33 GJ/MT** of crude processed.

### Energy intensity per unit of crude processed

| Parameter                                   | FY 2023-24 | FY 2022-23 | FY 2021-22 |
|---------------------------------------------|------------|------------|------------|
| Energy intensity (GJ/MT of crude processed) | 4.33       | 4.37       | 5.05       |

### Total Energy Consumption (in million GJ)

**0.92%**  
reduction in total energy  
intensity per MT of crude  
processed in FY 2023-24

**1,480,592 GJ**  
of energy saved through  
energy conservation  
measures in FY 2023-24

During the year, we undertook various energy efficiency and conservation initiatives, which led to consolidated energy savings of **35,387 toe** (tonne of oil equivalent) and an equivalent emission reduction of **1,12,971 tCO<sub>2</sub>e**.

## Renewable Energy

MRPL has made significant strides in renewable energy by establishing solar plants across its facilities. The refinery complex now hosts a **6.06 MW** solar plant, the largest of the three installations, showcasing our commitment to integrating sustainable energy into our core operations. Additionally, a **2.5 MW** solar plant has been set up in the aromatic complex, while a **0.2 MW** plant powers the desalination unit. The three installations collectively generate about **7.89 million kWh** of green electricity annually. These initiatives not only reduce our carbon footprint but also contribute to monetary savings, aligning with global sustainability goals and reinforcing our leadership in clean energy adoption.

Solar rooftop harnessing

Solar plant at desalination unit

## Emissions Management

We are committed to achieving our Net-Zero emissions target by 2038 and have undertaken several key projects and initiatives to reduce carbon emissions. A major initiative is the development of a **500 TPA** green hydrogen plant, which will produce green hydrogen using renewable energy sources, replacing the conventional grey hydrogen produced via the steam methane reforming process. Additionally, we are enhancing our capacity to import renewable power from the grid by increasing from the current **28 MW** to **102 MW** by FY 2027-28, a project that is expected to save **1,19,028 Mtoe** of energy. We are also establishing a Bio-ATF plant with a capacity of **20 KLPD**. This facility will use sustainable feedstocks such as palm stearin, used cooking oil (UCO) and tree-borne oil, leading to a **77%** reduction in GHG emissions compared to traditional ATF production.

In FY 2023-24, the total emissions stood at **56,105,825 tCO<sub>2</sub>e**, including Scope 1 emissions of **5,515,578 tCO<sub>2</sub>e**, Scope 2 emissions of **153,542 tCO<sub>2</sub>e**, and Scope 3<sup>3</sup> emissions of **50,436,705 tCO<sub>2</sub>e**. The scope 1 and 2 emission intensity were **5.39 tCO<sub>2</sub>e/INR million** and **0.34 tCO<sub>2</sub>e/MT** of crude processed. We conducted a detailed inventory of our GHG emissions with consideration of gases like CO<sub>2</sub>, CH<sub>4</sub>, N<sub>2</sub>O and the fugitive gases which will help us to design the potential emission reduction plans.

<sup>3</sup>In Oil and Gas companies, scope 3 accounts for around 85-90% of total emissions. The scope 3 accounting for MRPL includes seven categories that are C1 - Purchased goods and services, C3 - Fuel and energy related activities, C4 - Upstream transportation and distribution, C5 - Waste generated in operations, C9 - Downstream transportation and distribution, C10 - Processing of sold products, C11 - Use of sold products.

Total Emissions Breakdown (in Million tCO<sub>2</sub>e)

## Emission intensity per unit of crude processed

| Parameter                                                     | FY 2023-24 | FY 2022-23 | FY 2021-22 |
|---------------------------------------------------------------|------------|------------|------------|
| Emission intensity (tCO <sub>2</sub> e/MT of crude processed) | 0.34       | 0.35       | 0.34       |

## Scope 3 Emissions Breakup FY 2023-2024

## Managing Scope 1 and 2 Emissions

We are actively addressing our Scope 1 and Scope 2 emissions through a range of energy conservation and sustainability initiatives. To reduce Scope 1 emissions, we have implemented several energy conservation and energy efficiency measures: including installing Variable Speed Drives (VSDs), upgrading to high-efficiency equipment and minimizing steam leaks, flaring. These efforts have resulted in emission reduction of **~112,885 tCO<sub>2</sub>e** emissions. Additionally, we focused on expanding our natural gas infrastructure, investing **~INR 100 Crore** to utilize LNG as a cleaner fuel in our refinery and aromatic complex. This infrastructure includes an LNG metering skid and associated facilities, enabling the import of **0.8 MMSCMD** of Regasified Liquefied Natural Gas (RLNG).

To mitigate our Scope 2 emissions, we have invested in renewable energy, setting up solar plants with a total capacity of **8.76 MW** across our refinery, aromatic complex and desalination unit. In FY 2023-24, our total solar electricity consumption was **16,241 MWh**, including in-house renewable electricity generation and purchases from external sources, alleviating an estimated amount of **11,629 tCO<sub>2</sub>e** GHG emissions.

Additionally, we are committed to green belt development, maintaining **699 acres** of green space, including **75 acres** of afforestation in Pilikula and Bengre. This green belt plays a crucial role in carbon sequestration, capturing approximately **5,854 tCO<sub>2</sub>e** annually, further supporting our environmental sustainability goals.

## Air Emissions

We are committed to responsible air emissions management, monitoring environmental data as per approved plans by pollution control boards and reporting to the Central Pollution Control Board (CPCB), the State Authorities and the Ministry of Environment, Forest and Climate Change (MoEFCC). In FY 2023-24, we achieved a reduction in air emissions compared to the previous year. We also comply with the National Ambient Air Quality Standards (NAAQS), ensuring adherence to statutory air quality requirements.

## Air Emissions Overview

| Parameter                        | Unit             | FY 2023-24 | FY 2022-23 |
|----------------------------------|------------------|------------|------------|
| NOx                              | Tonnes per Annum | 2,354      | 2,613      |
| SOx                              | Tonnes per Annum | 16,563     | 21,301     |
| Particulate Matter (PM)          | Tonnes per Annum | 175.2      | 211.7      |
| Volatile Organic Compounds (VOC) | Tonnes per Annum | 1.04       | 2.11       |

## Water and Effluents Management

Our water and effluents management strategy focuses on optimizing water usage and ensuring environmentally responsible effluent treatment. We employ advanced treatment technologies to recycle and reuse water within our operations, minimizing freshwater withdrawal. Effluent quality is rigorously monitored to meet stringent regulatory standards, safeguarding local ecosystems.

Our water requirements are met through multiple sources, including water from the Netravathi River, treated sewage from the Mangalore Special Economic Zone (MSEZ), recycled treated effluent, and desalinated seawater. The water is primarily used for cooling tower makeup, service water, drinking water, and as feed for the Demineralization (DM) plant. We also utilize municipal STP water, consuming **3.6 MGD** to further minimize freshwater intake. We operate Effluent Treatment Plants to treat effluents, with most of the treated water recycled back to the cooling tower, while the remainder is safely discharged into the sea via a closed pipeline.

In FY 2023-24, the total water consumption of MRPL was **23,976,074 kL** with an intensity of **22.79 kL/INR million** and **1.45 kL/MT** of crude processed. Our total water discharge in FY 2023-24 was **11,173,088 kL** with the specified level of treatment to the seawater.

### Water withdrawal by source

| Parameter                              | Unit      | FY 2023-24        | FY 2022-23        | FY 2021-22        |
|----------------------------------------|-----------|-------------------|-------------------|-------------------|
| Surface Water                          | kL        | 13,541,904        | 17,153,026        | 14,752,903        |
| Ground Water                           | kL        | 0                 | 0                 | 0                 |
| Third party Water                      | kL        | 0                 | 0                 | 0                 |
| Seawater/Desalinated Water             | kL        | 10,486,090        | 5,995,405         | 0                 |
| Other – Treated municipal sewage water | kL        | 6,012,092         | 6,109,556         | 6,587,079         |
| <b>Total Water Withdrawal</b>          | <b>kL</b> | <b>30,040,086</b> | <b>29,257,987</b> | <b>21,339,982</b> |

MRPL received the prestigious **EEF Global Water Management Company of the Year Award 2023** from Minister of Housing and Union minister, on August 25, 2023 at New Delhi

**Total Water Consumption (in million kL)**

**We also carried out various initiatives to address the concerns relating to the withdrawal of freshwater:**

**MUNICIPAL STP WATER**

In FY 2023-24, we utilized 3.6 MGD of treated water from a municipal STP in our operations to significantly reduce reliance on freshwater intake.

**MRPL DESALINATION PLANT**

We have expanded our desalination plant capacity from 30 to 40 MLD, enhancing our ability to meet water demands sustainably.

**FEASIBILITY STUDY**

We collaborated with the University of Agriculture and Horticultural Sciences, Shivamogga, to carry out a study on checking the feasibility of the treated effluent for gardening usage.

**Water-related Impacts**

At MRPL, we adopt a comprehensive strategy to ensure sustainable operations and minimize negative impacts on water resources. We assess both direct and indirect water-related impacts, including water intake for refining, treated effluent discharge, and potential leaks or spills, as well as downstream water quality changes, habitat disruption, and effects on local communities' access to clean water. We consider both immediate and long-term impacts, recognizing the cumulative effects on local water bodies over time. We employ regular water quality monitoring within our facilities and in surrounding areas to ensure compliance with regulatory standards and to identify any deviations. Collaborative research with reputable organizations also plays a key role in understanding the implications of water use.

Committed to responsible water stewardship, we engage with local communities, government agencies, and environmental organizations to understand and address water-related concerns. Feedback from stakeholders is integrated into operations, with practices implemented to reduce water usage and environmental impact.

Furthermore, we collaborate with suppliers and customers to enhance water efficiency across the supply chain, promoting water-saving technologies, reuse initiatives, and sustainable water management practices. Through these efforts, we aim to mitigate water-related risks, improve water resilience, and support the long-term sustainability of water resources in the regions where it operates.

**Water Discharge Related Impacts**

MRPL treats its effluents to comply with the Minimum National Standards (MINAS) established by the MoEFCC for oil refineries. Adherence to the MINAS, as per the MoEFCC 2008 notification, ensures that the discharge meets stringent environmental regulations, minimizing the impact on marine ecosystems and safeguarding water quality in the surrounding environment.

## Case Study:

# MRPL Desalination Plant – A Strategic Move Towards Water Sustainability

### BACKGROUND

MRPL is situated on India's western coast in Karnataka. Historically, the Company relied heavily on the Netravathi River for its water needs, a river that also serves the nearby Mangaluru City, local villages and agricultural lands. Increasing industrial activity, rising demand for drinking water and changing rainfall patterns have led to a significant strain on this vital water source. The scarcity of freshwater has even forced MRPL to partially shut down refinery operations on several occasions.

### CHALLENGE

The growing demand for water from Mangaluru City and the changing climate posed a significant risk to MRPL's refinery operations. With the need to ensure a reliable water supply for both current operations and future expansions, MRPL faced the challenge of reducing its dependency on the Netravathi River to sustain refinery activities.

### SOLUTION

MRPL turned to seawater desalination—a proven global technology for conserving freshwater resources. On November 17, 2021, the Company commissioned a seawater desalination plant with an initial capacity of 30 MLD, which was later expanded to 40 MLD in FY 2023-24. This project, costing INR 677 Crore, was a significant investment towards securing a sustainable water source and was inaugurated by Honorable Prime Minister Shri Narendra Modi on September 2, 2022.

### THE PROCESS

The desalination plant, located on the Arabian Sea, utilizes the Reverse Osmosis (RO) technology. Seawater is drawn through an intake system located 950 meters offshore, processed through several treatment stages—including pre-treatment, seawater RO—and ultimately converted into high-quality water with TDS levels reduced from 32,000-38,000 mg/L to less than 10 mg/L. The plant has a design capacity of fetching seawater at a rate of 7,708 m<sup>3</sup>/h, with a design capacity of producing 2,917 m<sup>3</sup>/h of treated water.

### IMPACT AND BENEFITS

The MRPL desalination plant has delivered significant social, economic and environmental benefits:

#### WATER SECURITY

The plant ensures a sustainable water supply for the refinery, supports domestic water needs in the district and offers water security for new industries in the region.

#### ENVIRONMENTAL STEWARDSHIP

The project supports MRPL's commitment to the UN SDGs, including SDG-6 (Clean Water and Sanitation), SDG-9 (Industry, Innovation and Infrastructure), SDG-12 (Responsible Consumption and Production) and SDG-13 (Climate Action).

#### CONSERVATION OF SURFACE AND GROUNDWATER

By reducing dependency on freshwater sources, MRPL is contributing to the conservation of local water bodies.

## Waste Management and Circularity

Waste management and circularity are crucial components of sustainable development, aimed at minimizing waste generation and maximizing resource efficiency. We produce polypropylene for downstream producers and manage the packaging materials through Extended Producer Responsibility (EPR), as mandated by the Central Pollution Control Board (CPCB). We ensure all e-waste is responsibly disposed of through certified e-waste recyclers. Hazardous waste is managed according to the waste disposal hierarchy and complies with the Hazardous Waste Management Rules, 2016. We dispose of all non-hazardous waste by partnering with recyclers, ensuring that all waste streams are handled in an environmentally responsible manner.

### Detailed breakdown of waste generated from operations

| Category of waste generated  | Unit             | FY 2023-24      | FY 2022-23      | FY 2021-22      |
|------------------------------|------------------|-----------------|-----------------|-----------------|
| Plastic waste                | MT               | 1,947.9         | 2,270.4         | 2,028.7         |
| E-waste                      | MT               | 3.2             | 3.4             | 1.7             |
| Bio-medical waste            | MT               | 0.8             | 0.5             | 0.5             |
| Battery waste                | MT               | 9.5             | 2.4             | 2.4             |
| Other hazardous waste        | MT               | 7,587.7         | 9,304.9         | 8,619.2         |
| Other non-hazardous waste*   | MT               | 4,896.0         | 3,844.3         | 4,170.0         |
| <b>Total waste generated</b> | <b>MT</b>        | <b>14,445.1</b> | <b>15,425.9</b> | <b>14,822.5</b> |
| <b>Waste intensity</b>       | <b>MT/INR Mn</b> | <b>0.014</b>    | <b>0.013</b>    | <b>0.017</b>    |

\*Non-hazardous waste majorly includes metal scrap and insulation.

**65%**  
of total waste generated  
was diverted from  
disposal in FY 2023-24

**55,812 MT**  
of slop oil was recovered  
through recovery options  
in FY 2023-24

### Category of Waste (FY 2023-24)

## Detailed breakdown of waste disposal methods

| Category of Waste                        | Unit | FY 2023-24 | FY 2022-23 | FY 2021-22 |
|------------------------------------------|------|------------|------------|------------|
| <b>WASTE DIVERTED FROM DISPOSAL</b>      |      |            |            |            |
| Recycled                                 | MT   | 6,039.4    | 3,913.2    | 5,117.4    |
| Reused                                   | MT   | 3,347.9    | 4607.0     | 2,566.8    |
| Other recovery operations – slop oil     | MT   | 55,812.0   | 1,47,663   | 19,298.4   |
| <b>WASTE DIRECTED TO DISPOSAL</b>        |      |            |            |            |
| Incineration                             | MT   | 294.9      | 14.9       | 10.3       |
| Landfilling                              | MT   | 0          | 292.4      | 304.2      |
| Other disposal operations - coprocessing | MT   | 4,047.7    | 3,074.4    | 1,138.1    |

Circularity, or the circular economy, goes beyond traditional waste management by designing out waste and promoting the reuse, remanufacturing and recycling of materials. This approach keeps resources in use longer, reduces dependence on finite resources and supports sustainable economic growth.

We manage the waste generated by our operations through the ERP portal and are adopting the circular economy principles to reduce waste and optimize resource use by emphasizing reduction, reuse, recycling and regeneration. We reprocess slop oil and blend used oil with crude oil, ensuring efficient resource utilization. Additionally, sludge from the ETP is reprocessed in the Delayed Coker Unit (DCU), further contributing to waste minimization. We have established comprehensive standard operating procedures to ensure that these waste management practices are effective and aligned with our sustainability goals, reinforcing our commitment to responsible resource management and environmental stewardship. As a part of our ongoing waste management efforts, we have installed a vermicomposting technology where special breed of worm *Eudrilus eugeniae*, also called the 'African Nightcrawler', is used to manage the solid waste through vermicomposting process. In FY 2023-24, around 36 MT of vermicompost was harvested from three different facilities and utilized. We ensure that the processes meet the latest standards and minimize environmental impacts. No significant spills occurred in the reporting period.

## Biodiversity Management

Biodiversity and ecosystem management is a key aspect of our commitment to sustainability and environmental stewardship. Our biodiversity management strategy is centered around preserving and enhancing the natural ecosystems surrounding our operations. We implement proactive measures to protect local flora and fauna, restore habitats and mitigate any potential impacts of our industrial activities.

Situated at Kuthethoor P.O., in Karnataka the MRPL complexes spans approximately 2,034 acres, including a greenbelt area of 699 acres. Although this operational site is not located within any officially protected areas, nor is it adjacent to regions recognized for high biodiversity outside protected areas, we actively manage our land with a strong focus on conserving and enhancing the local ecosystem.

Our operational site is predominantly characterized by terrestrial ecosystems, which support a wide variety of local flora and fauna. The surrounding area is rich in biodiversity, with habitats that are crucial for the survival of many species. While the primary focus is on the terrestrial ecosystem, we acknowledge that our operations may also have an indirect influence on nearby freshwater ecosystems. We, therefore, strive to mitigate any potential negative impacts through careful planning and management.

A critical element of our biodiversity management strategy is the maintenance of our extensive greenbelt. The greenbelt serves as a buffer zone, providing a habitat for wildlife and contributing to the overall environmental quality of the region. This greenbelt helps in stabilizing soil, regulating microclimates and supporting biodiversity by offering refuge to various species. Furthermore, it acts as a natural barrier, reducing the impact of industrial activities on the surrounding environment.

Although our operational site is not designated under any specific protected status, such as the IUCN Protected Area Management Categories or the Ramsar Convention, we adhere to high standards of environmental management. Our approach to ecosystem management is guided by comprehensive policies and procedures that ensure compliance with environmental regulations and promote sustainable practices. This includes regular environmental impact assessments, monitoring of biodiversity indicators and implementing measures to protect and enhance local ecosystems.

### Impacts on biodiversity due to our activities, products and services

We recognize that our operations, including manufacturing, infrastructure expansion and habitat conversion for human settlement, can likely impact biodiversity by causing habitat fragmentation, disrupting natural ecosystems and altering local hydrology.

Pollution, including accidental spills, leaks and runoff, poses significant risks by contaminating water and soil. We have implemented preventive measures at the design stage to minimize these risks, although the threat remains, particularly concerning the accidental introduction of invasive species, pests and pathogens.

Habitat conversion due to industrial activities is a critical issue, as it depletes natural environments and fragments ecosystems. This process threatens local flora and fauna, potentially leading to a reduction in species. However, we have prioritized habitat preservation to support biodiversity and maintain ecological balance.

The impact of our actions on species vary; some benefit from habitat modifications, while others suffer from habitat loss, pollution, or disturbance. These impacts are generally localized around the refinery, but can extend to surrounding areas, depending on the nature and duration of the activities. While some effects are short-term and reversible, others may be longer-lasting. Our efforts in habitat restoration and conservation aim to ensure reversible effects, with no current evidence of irreversible damage such as species extinction or habitat degradation beyond recovery.

## List of IUCN species identified by level of extinction risk:

## Endangered

4

- *Coffea arabica*
- *Dipterocarpus indicus*
- *Syzygium caryophyllatum*
- *Tectona grandis*

## Vulnerable

5

- *Dalbergia latifolia*
- *Hopea odorata*
- *Hopea ponga*
- *Santalum album*
- *Saraca asoca*

## Near Threatened

6

- *Dypsis lutescens*
- *Swietenia mahagoni*
- *Threskiornis melanocephalus*
- *Eryx whitakeri*
- *Semnopithecus priam*
- *Panthera pardus ssp*

## Initiatives Undertaken to Manage the Neighboring Ecosystem

- **Biodiversity Impact Reports and Specific Actions:** Experts conducted a rapid biodiversity assessment and management plan to evaluate ecological diversity in our operational areas, identify key hotspots, assess threats, and propose strategies for conservation and management.
- **Biodiversity Preservation and Enhancement Initiatives:** We planted threatened species such as *Gymnacranthera farquhariana*, *Knema attenuata*, and *Syzygium travancoricum* within our refinery premises. In FY 2023-24, we enhanced biodiversity by planting 6,545 tree saplings, contributing to the area's ecological health.
- **Afforestation Projects:** In collaboration with the Karnataka Forest Department, we undertook a 25-acre afforestation project at Tannirbhavi Beach-Bengre that focuses on planting seashore-adaptable species such as *Calophyllum inophyllum*, *Ficus*, and Rubber trees. Meanwhile, a 50-acre project in Pilikula, with the Pilikula Development Authority, involves planting threatened and endangered Western Ghat species.

# Social Responsibility

At MRPL, social responsibility underpins our operations and is deeply embedded in our business ethos. We are committed to creating a positive impact on our employees, communities and value chain partners while fostering inclusive and equitable growth. For our employees, we prioritize health, safety, and career development through initiatives like the Leadership Development Program for Women Executives and partnerships with leading institutions for management training.

Our community development efforts, guided by our 'Samrakshan' banner, focus on education, healthcare, infrastructure and sustainability. Signature programs include installing water purifiers at schools, supporting millet distribution for vulnerable populations and afforestation projects in collaboration with the Karnataka Forest Department.

We maintain a responsible value chain by promoting local sourcing, conducting capacity building sessions for suppliers and adhering to stringent ethical and sustainable practices. Engagement with stakeholders, including customers, is a cornerstone of our approach, ensuring robust grievance mechanisms, product safety and transparency in all interactions.

This section outlines MRPL's comprehensive approach to fostering social equity, addressing stakeholder needs and ensuring that our operations create long-term value for society.

## SDG Aligned

# Social

At MRPL, we are focused on fostering a positive and inclusive social impact through our operations and community engagements. We recognize our responsibility towards our employees, stakeholders and the communities in which we operate.

The social dimension of sustainability is integral to our business strategy, aligning with our core values and mission to drive sustainable growth. We emphasize the well-being, safety and development of our employees. We offer a range of programs and benefits designed to support employees' physical, mental and professional growth. This includes health and safety initiatives, continuous learning and development opportunities and a supportive work environment that encourages innovation and collaboration.

We are committed to promoting diversity and inclusion within our workforce and strive to create an inclusive culture where all employees can thrive. Our policies and practices aim to eliminate discrimination and promote equal opportunities for all, regardless of gender, ethnicity, or background. Our approach to social responsibility is anchored in the principles of inclusivity, equity and community development. We are dedicated to creating a safe, supportive and empowering environment for all our employees. This commitment is reflected in our adherence to fair labor practices, promotion of diversity and inclusion and investment in employee well-being.

One of the key pillars of our social sustainability strategy is our robust community engagement and development programs. We actively collaborate with local communities to address their needs, contributing positively to regional socio-economic development through education, healthcare and infrastructure development initiatives. We employ a comprehensive stakeholder engagement process that includes consultations with employees, local communities, government bodies and Non-Governmental Organizations (NGOs). This collaborative approach ensures that the voices of all stakeholders are heard and considered in the decision-making process, fostering transparency and accountability.

## Our Employees

At MRPL, our employees are our greatest asset. We prioritize employee engagement through regular feedback mechanisms, ensuring every voice is heard. Our comprehensive benefits package includes health insurance, retirement plans and wellness programs, fostering a supportive work environment. We invest in continuous training and development, offering courses and workshops to enhance skills and knowledge. Attracting and retaining top talent is a key focus, achieved through competitive compensation, a positive workplace culture and opportunities for growth. We are committed to career development, providing clear pathways for advancement and personalized career planning to help our employees achieve their professional goals. We also ensure that people face no discrimination in our operations.

Our policies include a minimum notice period of four weeks in case of operational changes, ensuring ample time for employees to adjust. Additionally, the management has signed a Long-Term Settlement (LTS) with the recognized employees' union, covering wage revision and other work-related benefits for a duration of 10 years. This agreement includes provisions for regular negotiations, reflecting our dedication to maintaining fair and transparent workplace practices. These measures underscore our commitment to fostering a supportive and stable working environment for all our employees.

### Employment

Our organization's focus on efficient human resource management has been crucial to our success, aligning with our goal of developing safe, innovative, and sustainable mobility solutions for all. Our total workforce comprises of **2,548** employees which includes **1,184** management employees, **1,364** non-management employees, and **3,959** non-permanent workers in the reporting period.

#### Workforce composition by category and gender as on March 31, 2024

| Employee Category            | FY 2023-24 |        |       | FY 2022-23 |        |       | FY 2021-22 |        |       |

### Age-Wise Employment Distribution (FY 2023-24)

### Employee Engagement

At MRPL, we believe that regularly engaging with employees is the foundation of our success. Our approach to employee engagement involves creating an inclusive workplace where every team member feels valued and heard. Through regular surveys, feedback sessions and open communication channels, we ensure that our employees' voices contribute to shaping our organizational strategies. This commitment to engagement fosters a positive work environment, enhances job satisfaction and drives overall productivity, ultimately aligning with our mission to deliver excellence in all our operations. We conduct regular engagement with employees as and when required either through circulars, newsletters, or e-mails, in person meetings. We also actively engage with other stakeholder groups whose details may be found in our Stakeholder engagement section on Page 24.

## Employee Benefits

We understand that comprehensive employee benefits are essential for fostering a supportive and productive work environment. Our benefits package is designed to enhance the well-being of our employees and their families, offering health insurance, retirement plans and wellness programs. Our focus is on providing benefits that not only meet immediate needs but also support long-term health, financial security and overall quality of life. By investing in our employees' well-being, we ensure a motivated and dedicated workforce, driving our success and growth. We also provide group term life insurance, medical insurance, parental and maternity leave and retirement provision.

We are dedicated to supporting our employees' well-being through comprehensive benefits. Our employees are provided with parental benefits of 26 weeks of maternity leaves and 15 days of paternity leaves. These policies are designed to help our employees to balance their professional and personal lives, ensuring they have the time and support needed during significant life events. By prioritizing family-friendly benefits, we foster a supportive and inclusive workplace, contributing to the overall satisfaction and productivity of our workforce. In FY 2023-24, 16 employees took maternity leave and 142 employees took paternity leave with 100% retention in the reporting period.

## Training and Development

At MRPL, we recognize that continuous learning and development are critical to both individual and organizational success. In FY 2023-24, our total training hours/employee was 21.53 hours/employee in which average training for male employees was 21.45 hours/male employee and average training for female employees was 22.37 hours/female employee. Our comprehensive training and development programs are designed to enhance the skills, knowledge and competencies of our employees. These programs cover a wide range of areas, including mandatory trainings, technical skills, leadership development and soft skills, ensuring that our team is well-equipped to meet the evolving demands of the industry. The importance of these initiatives lies in their ability to foster innovation, improve performance and support career advancement. By investing in our employees' growth, we not only enhance their personal development but also drive MRPL's success and competitiveness in the market.

## Total training hours/Employee

## Training for Security Personnel:

At MRPL, we have three different agencies namely Central Industrial Security Force (CISF), Directorate General Resettlement (DGR), private security agency to look at security related services in and around our operations. CISF is a professional Industrial Security Force under Ministry of Home Affairs (MHA) and training requirements are regularly taken care as per MHA guidelines. The training requirements for DGR and private security agency is as per the PSARA act.

**100%**  
of security personnel  
received training on  
human rights aspects

## Agency-wise breakdown of human rights training for security personnel

| Agency Name             | Number of security personnel |        |       | Number of security personnel received trainings on human rights aspects |        |       |
|-------------------------|------------------------------|--------|-------|-------------------------------------------------------------------------|--------|-------|
|                         | Male                         | Female | Total | Male                                                                    | Female | Total |
| CISF                    | 233                          | 13     | 246   | 233                                                                     | 13     | 246   |
| DGR                     | 30                           | 0      | 30    | 30                                                                      | 0      | 30    |
| Private security agency | 201                          | 3      | 204   | 201                                                                     | 3      | 204   |

At MRPL, we prioritize training on ethical conduct and anti-corruption measures for both newly inducted and existing employees. New employees receive comprehensive training on Ethics and Integrity, Preventive Vigilance and Annual Property Return (APR) Submission. Additionally, they are educated on MRPL's Conduct Discipline and Appeal (CDA) Rules, which include various clauses and clarifications on anti-corruption measures. Existing employees participate in quarterly training sessions covering various aspects of Ethics and Integrity and Preventive Vigilance. During Vigilance Awareness Week (VAW), observed annually in October-November, extensive training on anti-corruption measures is provided which also features other anti-corruption awareness activities, such as the display of posters and banners. In FY 2023-24, there were zero incidents of legal actions pending or completed regarding the anti-competitive behavior and violations of anti-trust and monopoly legislation.

## Employee participation in anti-corruption communication and training

| Employee Category                                        | Total No. of employees | Total No. of employees communicated regarding the Anti-corruption | % of employees communicated regarding anti-corruption | Total No. of employees receiving anti-corruption training | % of employees received training on anti-corruption |
|----------------------------------------------------------|------------------------|-------------------------------------------------------------------|-------------------------------------------------------|-----------------------------------------------------------|-----------------------------------------------------|
| Top Management                                           | 3                      | 3                                                                 | 100%                                                  | 0                                                         | 0%                                                  |

MRPL has policy and procedure in place to identify the incidents of corruption. The complaints of corruption from stakeholders are thoroughly investigated, and random audits of procurement and other routine company files are conducted to enhance transparency and drive improvements. In FY 2023-24, we had zero incidents of corruption and public legal cases of any sought.

### Talent Attraction and Retention

Attracting and retaining top talent is a cornerstone of our human resource strategy. We offer comprehensive benefits and a dynamic work environment that fosters growth and innovation. Our commitment to professional development is evident through robust training programs and continuous learning opportunities. By investing in our employees' growth and providing clear pathways for career advancement, we ensure a motivated and dedicated workforce, driving our success and maintaining our competitive edge in the industry. MRPL been a Public Sector Undertaking follows a practice of nomination from MoPNG, Government of India, Stakeholders for the position of senior management/ board of directors.

## Career Development

We are committed to fostering the growth and advancement of our employees through comprehensive career development opportunities. We offer structured career development programs that include continuous learning, skill enhancement and leadership training. Regular career development reviews are conducted to provide personalized feedback and to set clear, achievable career goals. These reviews help employees identify their strengths, areas for improvement and potential career paths within the organization. By investing in our employees' professional growth and providing them with the tools and support needed for career advancement, we ensure a dynamic, skilled and motivated workforce that drives MRPL's success. We also have a post-retirement policy that includes pension schemes, healthcare and transition assistance.

We also prioritize programs focusing on upgrading employee skills and providing transition assistance to ensure seamless career progression. We collaborate with prestigious institutes such as Indian Institute of Management (IIM) Kozhikode, T. A. Pai Management Institute (TAPMI), National Institute of Technology Karnataka, Sahyadri College, NITTE Institute and St Aloysius Institute of Management & Information Technology (AIMIT) to offer Management Development Programs for our management and non-management employees, emphasizing behavioral skills development. Additionally, we conduct specialized superannuation training programs to support employees transitioning into retirement. These initiatives are crucial in fostering innovation, improving performance and supporting both personal and professional growth, thereby driving MRPL's overall success. In FY 2023-24, we conducted leadership training sessions for women in which eight employees benefitted from trainings such as development of women executives, leadership development for women employee and managerial excellence program at IIM Kozhikode. We had also undertaken few sustainability-specific training initiatives, which include renewable energy, water conservation, afforestation and community engagement initiatives for 24 employees.

## Occupational Health & Safety

We acknowledge and understand the paramount importance of maintaining a safe work environment for all our employees and stakeholders. Our commitment to occupational health and safety is reflected in our stringent safety protocols and proactive measures. We conducted various awareness sessions in FY 2023-24, including topics such as snake bites, personal hygiene, kidney failure prevention and cancer screening. We prioritize workforce well-being by placing prominent health and safety signs throughout our plants, serving as constant reminders to prevent accidents.

MRPL is certified with the ISO 45001:2018 Occupational Health and Safety Management System. As an oil and gas industry entity, we adhere to guidelines set by the Oil Industry Directorate, including OISD-GDN-206 (Guidelines on Safety Management System in the Petroleum Industry), OISD-GDN-207 (Contractor Safety) and OISD-GDN-166 (Guidelines for Occupational Health Monitoring in the Oil and Gas Industry). As part of the Integrated Management System Audit, which encompasses ISO 9001:2015, ISO 14001:2015, ISO 45001:2018, ISO 50001:2018 and external statutory audits by third-party agencies and the Oil Industry Safety Directorate, we ensure all employees and workers are covered under the Occupational Health and Safety Management System. We have also adopted standards, methodologies of IS 14489:2018 (Code of Practice on Occupational Health and Safety Audit), maintaining rigorous standards for occupational health and safety.

We have an internal Health Information Management System (HIMS) to maintain the organizations health related data.

**We are dedicated to ensuring the health and well-being of our employees and secondary workforce through a range of comprehensive health services and proactive health monitoring programs:**

### Annual Medical Examination

All employees undergo an annual medical examination to monitor their overall health. This thorough check-up helps in maintaining a healthy workforce and ensures that any medical conditions are promptly addressed.

### Periodic Testing and Audiometry testing

We conduct periodic urine phenol testing and audiometry testing to monitor specific health parameters related to occupational exposure and hearing capabilities. These tests are crucial in identifying any adverse health effects resulting from workplace conditions, enabling timely intervention and preventive measures.

### Awareness Sessions

Regular awareness sessions are conducted for employees and the secondary workforce to educate them on health and safety practices. These sessions cover a wide range of topics, including occupational health risks, preventive measures, and the importance of maintaining a healthy lifestyle.

### First Aid and Emergency Medical Services

Our Occupational Health Centers (OHCs) are equipped to provide first aid treatment and are supported by a team of dedicated healthcare professionals, including doctors, Emergency Medical Technician (EMT) technicians, and staff nurses. Additionally, we offer 24/7 ambulance services to ensure immediate medical assistance is available in case of emergencies. This robust support system ensures that any health issues are swiftly addressed, providing employees with the care they need.

### Worker Consultation and Participation in Safety Processes

We prioritize the active consultation and participation of our workers in various safety processes. This includes their involvement in hazard identification, risk assessments, control determinations, incident investigations, Area Safety Committee meetings, policy and objectives reviews, preparation of Safe Work Method Statements/Job Safety Analysis and toolbox meetings. Our goal is to ensure a safe and healthy work environment for all employees.

We have formal joint management-worker health and safety committees in place, such as Area Safety Committee meetings, Central Safety Committee meetings and management reviews. These committees meet regularly to discuss matters related to accidents, near-miss incidents and the findings of investigation committees. They also assess the magnitude of safety issues and decide on corrective actions to eliminate the causes of potential non-conformities and investigate any impacts caused.

### Training and Development

We provide comprehensive occupational health and safety training to all workers. This includes both generic training and specialized instruction on work-related hazards, hazardous activities, and potentially dangerous situations. Our goal is to equip every employee with the knowledge and skills necessary to maintain a safe and healthy working environment.

In addition to this induction training, job-specific training is provided, ensuring that each worker is well-prepared for their role.

Assessing Training Needs – Training needs are meticulously assessed based on several factors:

- Identification of gaps between current worker capabilities and job requirements
- Compliance with legal and regulatory training mandates
- Anticipation of future skills needed by the company
- Keeping pace with new technologies and innovations
- Preparing employees for different roles they might rotate into
- Aligning training with the Company's strategic goals and adopted strategies

### Development of Training Programs

Our training programs are specifically designed to align with the types of tasks and responsibilities our employees will undertake. This customization considers:

- **Past Incidents:** Lessons learned from previous safety incidents.
- **Technological Advancements:** Integration of new technologies into training content.
- **Changes in Work Methods:** Adaptation to evolving work practices and methods.

**Zero**  
Fatalities and 1 RLT  
in FY 2023-24

**0.08**  
LTIFR per one million hours  
worked in FY 2023-24

Induction Training: Every new entrant undergoes exhaustive half-day induction training that covers a wide range of topics, including:

### Awareness sessions and training programs conducted in FY 2023-24

Familiarization of MRPL health department and health infrastructure awareness to new joiners

Prevention of renal stone and kidney failure

Health talk and demonstration along with hands-on training on first aid and basic life support

Awareness talks on 'Health and Personal Hygiene'

Awareness talks on do's and don'ts on snake bite

HSE had organized various health-related competitions on World Health Day

Cancer screening camp

Awareness session and enacted skit regarding prevention of osteoarthritis of knee

Orientation lecture on MRPL Health infrastructure followed by training on first aid to new trainees

Awareness sessions and training programs conducted in FY 2023-24

Sight saver camp along with free spectacle distribution

Awareness session on honey-bee bite and snake bite

Panel discussion on women's health

Blood donation camp

These training programs are delivered in a language that most of our workers understand, ensuring clear communication and effective learning. Upon completing their training, employees report on the quality of the program. This department collects a mandatory feedback evaluation form from each participant. Based on the feedback received, the training and development department assesses the suitability of the training agency and the programs for future training initiatives.

We operate a fully equipped Occupational Health Centre (OHC) within our premises. The OHC offers round-the-clock ambulance services and includes emergency ward, recovery ward and continuous nursing care. Additionally, it is equipped with a shower facility for chemical contact poisoning, a pharmacy, and specific antidotes for inhalation poisoning. The OHC plays a critical role in ensuring immediate and effective medical responses to workplace health emergencies, providing comprehensive care to employees and contract workers.

## Diversity, Equity and Inclusivity

We are committed to fostering an open culture that values ideation, innovation and creativity through a diverse workforce. Recognizing the importance of diversity, equity and inclusion (DEI), we have made these areas a top priority in recent years. A diverse workforce is essential for achieving better results and we strive to reflect this by hiring individuals from various backgrounds, genders and communities. We actively promote equal opportunity employment and support diversity in leadership roles, with specific training programs aimed at developing leadership skills for women employees, as reflected in the leadership training initiatives at IIM Kozhikode.

We are dedicated to ensuring that all employees receive equal rights and respect, regardless of gender, ethnicity, cultural background, age, region, caste, religion, marital status, race, disability, or language. In FY 2023-24, we conducted several awareness workshops focusing on female employees' rights and workplace facilities, underscoring our commitment to an inclusive environment.

Our workforce includes 3,659 male and 300 female contractual workers across various operational sites. The permanent workforce comprises 1,114 male and 70 female management employees, alongside 1,205 male and 159 female non-management employees. For information on the age diversification of our employees, please refer to the 'Our Employees' section of the report on page 45. We employ numerous temporary workers for non-core tasks such as housekeeping, pantry services, horticulture and security.

### Gender Diversity (FY 2023-24)

### Statutory laws adopted by MRPL to promote gender equality:

|                                    |                                   |                                                                                                  |
|------------------------------------|-----------------------------------|--------------------------------------------------------------------------------------------------|
| The Equal Remuneration Act of 1975 | The Maternity Benefit Act of 1961 | The Sexual Harassment of Women at Workplace (Prevention, Prohibition, and Redressal) Act of 2013 |
|------------------------------------|-----------------------------------|--------------------------------------------------------------------------------------------------|

### Gender Pay Ratio across employee categories in FY 2023-24

| Employee Category            | Average Basic Salary | Average Total Remuneration |
|------------------------------|----------------------|----------------------------|
| Senior Management            | 0.86                 | 0.88                       |
| Middle Management            | 0.99                 | 0.94                       |
| Associates/Junior Management | 0.90                 | 0.83                       |
| Non-management Employees*    | 0.82                 | 0.69                       |

\* Employees in unionized category

## Case Study:

### Women Empowerment at MRPL

#### INTRODUCTION

MRPL is committed to fostering an inclusive and empowering environment for its workforce, with a strong focus on women's empowerment. Women constitute 8.99% of MRPL's workforce, and the Company has implemented a range of initiatives aimed at enhancing the socio-economic status of women within the organization and the broader community.

#### KEY INITIATIVES:

##### WORKPLACE SAFETY AND LEGAL COMPLIANCE

MRPL has fully implemented the provisions of the Sexual Harassment of Women at Workplace (Prevention, Prohibition, and Redressal) Act, 2013. An Internal Committee (IC), led by senior-level women employees, has been established to address any complaints of sexual harassment. Additionally, the company regularly conducts gender sensitization programs for male employees to promote a respectful and inclusive work environment.

##### SUPPORT SERVICES

Recognizing the unique needs of women employees, MRPL provides a range of support services, including transport facilities for those working in round-the-clock shifts, GPS-enabled vehicles with security features, and a crèche facility. A dedicated woman psychologist is available to provide counseling services, enhancing the well-being of women employees.

##### WOMEN IN PUBLIC SECTOR (WIPS) ACTIVITIES

MRPL's WIPS team actively participates in various activities that promote women's empowerment and community engagement. These include celebrating International Women's Day, participating in environmental initiatives like tree plantations and clean-up drives, and organizing health awareness sessions on topics such as menstrual hygiene and oncology screening for women employees.

##### PROMOTING WOMEN IN TECHNICAL ROLES

Traditionally male-dominated roles, such as those in the CHT process unit and the DM plant at the aromatic complex, are now operated exclusively by women employees. MRPL has also inducted women MBAs into petroleum sales, further breaking gender barriers in the industry.

##### TRAINING AND DEVELOPMENT

MRPL invests in the development of its women employees through targeted training programs. These include leadership development courses at prestigious institutions like IIM Kozhikode, aimed at equipping women executives with the skills needed to take on senior management roles.

##### CORPORATE SOCIAL RESPONSIBILITY (CSR) PROJECTS

MRPL's commitment to women's empowerment extends beyond its workforce through various CSR projects. These include donations of sewing machines, infrastructure support for women's cooperatives, and the distribution of incinerator napkin burner machines to promote menstrual hygiene in schools and colleges.

## IMPACT

MRPL's comprehensive approach to women's empowerment has resulted in significant social, economic, and environmental benefits. By promoting gender diversity in technical roles, providing robust support services, and engaging in community-focused CSR activities, MRPL not only enhances the lives of its women employees but also contributes to the broader goal of gender equality and social development.

## Human Rights

We have an unwavering commitment to upholding and protecting human rights across all our operations. Ensuring that there are no violations of human rights is a fundamental principle guiding our business practices. We strictly adhere to international human rights standards and national regulations, ensuring that all employees, contractors and stakeholders are treated with dignity and respect. Our policies and procedures are designed to prevent any form of discrimination, harassment, or exploitation and we actively promote a culture of transparency and accountability. Through regular trainings, robust reporting mechanisms and continuous monitoring, we strive to maintain a safe and respectful environment for everyone associated with MRPL.

**Zero**  
incidents of discrimination  
reported during FY 2023-24

**Zero**  
incidents of violations  
involving rights of  
indigenous people

Our dedication to human rights is integral to our mission of creating a positive impact on society and fostering sustainable growth. There were no reported incidents of violations of freedom of association and collective bargaining. No incidents of violations for operations and suppliers considered to have significant risk for incidents of forced or compulsory labor. MRPL strictly enforces a zero-tolerance policy for child labor and forced labor. Our online gate pass system effectively prevents underage workers/staff from entering MRPL premises. Moreover, all security and contract cell employees in the Human Resources department are trained to verify workers' ages using Aadhaar cards, ensuring rigorous compliance to our standards.

## Our Community Interventions

At MRPL, we are committed to making a positive impact on the communities in which we operate. Our community interventions are designed to address the needs and aspirations of local populations, fostering sustainable development and enhancing quality of life. MRPL's community development strategy is aligned with both national priorities and local needs, ensuring that our projects have meaningful and long-term impact.

We are dedicated to conducting our business in a manner that is economically, socially and environmentally responsible. Our social welfare and community development initiatives are focused on key areas such as education, healthcare and sanitation and the development of basic infrastructure. These initiatives primarily target the Dakshina Kannada district but are also extended to other neighboring districts within the State.

The Company's CSR projects are in alignment with Schedule VII of the Companies Act, 2013. The CSR and SD Committee evaluates the projects to ensure alignment with local needs and national development goals. Our Corporate Social Responsibility and Sustainable Development Policy, which guides these initiatives, has been amended periodically. Notable amendments include the inclusion of Swachh Bharat initiatives in the allocation of CSR funds, updates to the annual report format and revisions to the implementation methodology of CSR initiatives. This includes the delegation of authority for approving CSR projects. The CSR and SD Committee at MRPL is responsible for evaluating and updating the existing CSR strategy to ensure its effectiveness and relevance. This continuous evaluation process ensures that the CSR projects are implemented efficiently and meet the evolving needs of the communities served. The CSR and SD Policy may be accessed on the Company's website at <https://admin.mrpl.co.in/img/UploadedFiles/CSR/Files/English/f948bd82a01b4b78bbe79c373e1b7c29.pdf>

**INR 20.5 crore**  
Spent on various CSR  
activities in FY 2023-24

**We have undertaken a variety of significant CSR projects aimed at fostering community development and sustainability. These initiatives include:**

- Organizing artificial limb camps for beneficiaries.
- Providing drinking water facilities to government schools in Dakshina Kannada.
- Distributing millets to HIV patients and senior citizens in Dakshina Kannada.
- Equipping the KSRTC bus station in Mangaluru with water purifiers and passenger seating.
- Developing a public park in Karkala.
- Constructing a community hall in Huvina Hadagali, Vijayanagara District.
- Building an indoor stadium at Gonikoppal High School ground in Kodagu District.
- Installing napkin incinerators at government high schools in Dakshina Kannada.

A total of 156 different CSR projects were carried out in the reporting period. We prioritized education, healthcare, infrastructure and environmental sustainability in its CSR strategy to support community welfare. These efforts not only bring about positive changes in the community but also enhance our reputation as a responsible corporate entity.

Operating under the banner 'Samrakshan', our CSR activities are driven by the mission to protect, preserve and promote the social, cultural and environmental heritage in its business areas, while fostering sustainable development. Through our well-coordinated CSR programs, we are committed to promoting sustainable and equitable development in the communities it serves.

## The Five Focus Areas of Our CSR Activities

We have implemented comprehensive rehabilitation and resettlement programs to ensure that displaced communities are provided with fair compensation, new housing and support for livelihoods. We engage with local stakeholders and the government to ensure that the affected individuals are integrated back into society through various community development efforts, such as skill training and infrastructure improvements. This approach demonstrates our commitment to social responsibility and economic sustainability.

## Responsible Value Chain

In today's globalized and interconnected world, maintaining a responsible value chain is not just a strategic advantage but a fundamental necessity for sustainable business practices. At MRPL, we recognize that a responsible value chain is critical to ensuring long-term success, fostering trust and safeguarding our reputation. A responsible value chain ensures that ethical practices are upheld at every stage of our operations. This includes fair labor practices, non-discrimination and respect for human rights. By committing to these principles, we protect the welfare of all individuals involved in our supply chain, from workers to end consumers.

We are committed to maintaining a responsible value chain that upholds our core values of integrity, sustainability and social responsibility. This involves stringent regulatory adherence, proactive local sourcing and comprehensive supplier engagement to ensure ethical and sustainable practices throughout our operations.

### Regulatory Details

We strictly comply with all relevant local, national and international regulations governing our industry. We ensure that all aspects of our value chain, from procurement to delivery, meet the highest standards of environmental and social responsibility. Our framework is designed to promote transparency, accountability and continuous improvement in our practices. We have a policy in place to hire local suppliers, as per the Ministry of Petroleum and Natural Gas for Public Sector Undertakings and we comply with Purchase preference linked with local content (PP-LC).

### Local Sourcing (Non-Feedstock Purchases)

We prioritize local sourcing to support regional economies and reduce our environmental footprint. By partnering with local suppliers, we not only stimulate economic development in the communities where we operate but also ensure the availability of high-quality, reliable materials, and services. Our commitment to local sourcing is a testament to our dedication to fostering sustainable growth and building strong, resilient communities. By means to implement sustainable sourcing practices, reducing waste, and minimizing our carbon footprint, MRPL aims to contribute to the global effort to combat climate change and preserve natural resources. This not only benefits the environment but also enhances operational efficiency and resilience. At MRPL, we define local suppliers as those suppliers whose operations and upstream transportation lies within Indian territory.

We are yet to implement Material Requirements Planning (MRP), but it currently bases procurement decisions on quality and cost, incorporating pre-qualification and bid evaluation criteria in its tendering process. The company actively engages with vendors and service providers to promote awareness on key issues and encourage ethical business practices. In FY 2023-24, we conducted five vendor meets, including one exclusively for SC/ST and women entrepreneurs. To ensure sustainable procurement, MRPL maximizes purchases through the GeM portal and promotes MSME vendors in line with government guidelines. The GeM portal also enhances vendor accountability by blocking vendors who default with other companies, ensuring performance tracking. Additionally, MRPL enforces a holiday listing policy to maintain supplier quality, reliability, and accountability. All suppliers are rigorously screened according to the General Conditions of Contract, which include clauses on environmental, social, labor practices, and quality compliance, ensuring they meet both internal and statutory requirements.

**92%**  
of total suppliers are  
from India

**90%**  
of total supplier spend are  
on local suppliers

**34.20%**  
of total supplier spend are  
directly sourced from MSMEs

## Supplier Engagement

Engaging with our suppliers is a crucial component of our responsible value chain strategy. In FY 2023-24, we conducted capacity-building sessions with vendors to enhance awareness of ethical business practices and sustainable procurement. We work closely with our suppliers to ensure they adhere to our stringent ethical standards and sustainability practices. This includes regular audits, capacity-building programs and collaborative initiatives aimed at improving environmental and social outcomes. Through open communication and cooperation, we strive to build long-term, sustainable relationships with our suppliers that benefit all stakeholders involved.

**100%**  
of new suppliers were  
screened for social criteria

As a part of our supplier screening, all suppliers are thoroughly screened according to the General Conditions of Contract for every tender. This process includes clauses related to environmental, social, labor practice criteria and quality compliance, ensuring alignment with our internal control mechanisms and statutory requirements.

Additionally, we engage with our value chain partners through capacity-building sessions/workshops to ensure safe transportation of petroleum products. We undertake several actions to ensure the safe transportation of petroleum products, particularly regarding our transportation partners:

- TT (Tank Truck) crew members receive safety training at all locations to enhance their knowledge and adherence to safety protocols.
- All TT crew members are provided with simulation-based Defensive Driver Training (DDT) to improve their driving skills and reduce the risk of accidents.
- Road transport emergency mock drills are conducted to test the preparedness of TT crew members and transporters, ensuring they are ready to respond effectively in case of an emergency.
- Eye test camps are organized for TT crew members, with free spectacles distributed to those in need, ensuring they meet the required vision standards for safe driving.
- The canteen and restroom facilities at loading locations are upgraded to provide comfortable and hygienic conditions for the TT crew members during their rest periods.

**100%**  
of suppliers were assessed  
for social impacts

## Our Customers

Our customers are at the heart of everything we do. We strive to provide high-quality products and services that meet the diverse needs of our clientele. Our commitment to customer satisfaction drives us to continuously innovate, ensuring we deliver reliable, efficient, and sustainable solutions. By fostering strong relationships and maintaining open lines of communication, we strive to understand and exceed our customers' expectations. Our focus on responsible business practices ensures that we not only meet their immediate needs but also contribute to a sustainable future, building trust and loyalty along the way. We have also installed various retail outlets known as HiQ designed to offer high-quality petroleum products and excellent customer services directly in the market. In FY 2023-24, we achieved a significant milestone with our retail marketing space by inaugurating the 100<sup>th</sup> retail outlet in India, with 72 located in Karnataka and 28 in Kerala.

**Zero**  
Complaints of data breach,  
unfair practices received in  
the reporting period

At MRPL, we place a strong emphasis on customer engagement, ensuring that our customers' needs and concerns are heard and addressed promptly. We have implemented robust channels for customers to provide feedback, suggestions, or complaints. MRPL has a well-established contact mechanism for both direct and retail customers, facilitated through its regional offices and channel partners. Information regarding product availability or disruptions is disseminated effectively through various communication channels, including emails, telephone, social media, SMS, and notices. This ensures that end users are promptly and reliably informed.

We are committed to protecting our customers' data privacy. We adhere to strict data protection policies and practices to ensure that all customer information is securely handled and stored. Our data privacy measures comply with relevant regulations and industry standards, safeguarding the trust of our customers. To continuously improve our products and services, we conduct regular customer satisfaction surveys. These surveys help us gather valuable insights into our customers' experiences and expectations, allowing us to make informed decisions and enhancements. By actively seeking and analyzing customer feedbacks, we strive to achieve the highest levels of customer satisfaction and loyalty.

### Customer Information and Safety Measures

- Our polymer bags are printed with essential guidelines related to plastic waste management to promote environmental responsibility.
- Customers can access comprehensive product information through our official website at <https://mrpl.co.in>.
- We have placed suitable safety signages, Do's and Don'ts banners, and hoardings at our retail outlets to ensure a safe and informed customer experience.
- Regular training sessions are provided to our retail outlet attendants, including dealers, to ensure they can deliver accurate and up-to-date information about our products to customers.
- Regular information such as grade name, batch number, and quality type are prominently displayed on our polypropylene product packaging. Additionally, product specifications are shared with customers according to their specific requirements.
- MRPL actively seeks product and service feedback from our customers to continuously improve and align our offerings with customer needs and expectations.

### Grievance Redressal

To ensure that our customer's complaints are heard and addressed we have developed a grievance redressal mechanism. Customers can provide feedback, suggestions, or complaints about any products or services through two channels: by using the complaint register/suggestion book available at the retail outlet (Petrol Pump) or by contacting the dealer operators/owners and sales officers directly, with their contact numbers displayed on boards at each retail outlet. MRPL is under the Centralized Public Grievance Redressal and Monitoring System (CPGRAMS) initiative, where individuals or companies can raise their grievances and complaints about the products and services.

# Governance and **Ethical Leadership**

At MRPL, governance and ethical leadership form the cornerstone of our commitment to transparency, accountability and long-term sustainability. Guided by a robust governance framework, we adhere to the highest standards of corporate governance, aligning with regulatory requirements such as SEBI guidelines and global best practices. Our Board of Directors and specialized committees ensure effective oversight, ethical decision-making and alignment with strategic objectives.

Our governance structure emphasizes proactive risk management, responsible leadership and ethical operations. Policies such as the Whistleblower Policy, CSR & SD Policy and Integrated Management System provide clear directives that reinforce accountability and promote sustainability across all levels of the organization. Performance-linked evaluations and transparent reporting practices ensure stakeholder trust and drive continuous improvement. A comprehensive Enterprise-wide Risk Management (ERM) Policy addresses critical risks, ensuring effective mitigation.

This section details MRPL's comprehensive governance framework, highlighting our efforts to safeguard stakeholder interests, integrate sustainability into decision-making and foster ethical leadership to build a resilient and sustainable future.

## SDG Aligned

# Governance and Ethical Leadership

MRPL's governance framework is designed to ensure robust oversight, accountability, and strategic direction. It aligns with best practices and requirements by regulatory bodies such as the Securities and Exchange Board of India (SEBI), focusing on transparency, integrity, and long-term sustainability. Key components of our governance structure include the Board of Directors, committees, and executive management. We adhere to high standards of corporate governance, which are integral to our business philosophy and operations.

## Material Topics Addressed:

## Board of Directors

Our Board of Directors operates within the framework of Corporate Governance norms, ensuring transparency and effectiveness in all its functions. Our governance structure ensures that the Board functions in alignment with Corporate Governance norms and regulatory standards. We maintain a comprehensive Book of Delegated Powers along with detailed manuals such as the Material Management and Works Manual. These documents delineate the processes and specify the decision-making levels, whether at the Board, Committee of Directors, or Functional Director level. They are regularly reviewed and updated to align with the evolving needs of the organization.

The Board is supported by seven sub-committees that deliberate on various critical matters and provide recommendations to guide the Board's decisions. This structured approach to governance underpins MRPL's commitment to maintaining high standards of corporate governance, fostering accountability and ensuring that the interests of all stakeholders are upheld. As per the mandate of SEBI regulations, MRPL discloses its sustainability KPIs in the BRSR format which is reviewed and approved by the governance body during the Board meetings.

### Board Committees

As on March 31, 2024, the composition of Directors was 11 with three as executive directors and eight non-executive directors. The Board members are nominated and appointed by the Ministry of Petroleum and Natural Gas (MoPNG), Government of India. The detail composition is provided on page 17. At MRPL, the Chair of the highest governance body is also the senior executive of the organization, reflecting alignment in leadership and strategic direction. To avoid any conflicts, we have implemented a Code of Conduct for the Board of Directors and Senior Management, which emphasizes the importance of exercising sound judgment to avoid any situations, decisions, or relationships that may result in a conflict of interest. The Board members have defined roles and responsibilities as per the approved policies.

Additionally, Directors are required to submit declarations detailing their relatives and related parties in accordance with the Companies Act, 2013. Any related party transactions, including those involving Directors' relatives, are thoroughly reviewed by the Audit Committee. MRPL ensures communication of critical concerns are communicated to Corporate Social Responsibility (CSR) and Sustainability Development (SD) committees. Annual meeting is held by Independent Directors to evaluate the performance of the Board and the Chairman.

### **Remuneration and Performance Evaluation:**

As a Public Sector Undertakings (PSU), our remuneration, allowances and perks for our Whole Time Directors are determined by the Department of Public Enterprises (DPE) Guidelines, with guidance received through the Ministry of Petroleum and Natural Gas (MoPNG). These Directors are also eligible for Provident Fund and Superannuation Contributions in accordance with Company rules. The remuneration for officers below the Board level is approved by the Board of Directors, aligning with DPE Guidelines and Presidential Directives from MoPNG. Independent Directors receive sitting fees for attending Board and Committee meetings, while Government Nominee Directors do not receive any remuneration or sitting fees. MRPL does not pay any commission on profits to its directors.

### **Process of Remuneration:**

The performance of the Company and its Board members is evaluated using a combination of financial and non-financial criteria. The Memorandum of Understanding (MoU) outlines specific goals, weightages, and vision, including R&D and innovation activities, procurement from MSMEs (including marginalized groups and women), compliance with company law and key economic indicators such as revenue, market capitalization, capital expenditure and EBITA. The performance review for senior management, including the Managing Director, Directors, Executive Directors (EDs), and Group General Managers (GGMs), is based on individual parametric scoring, considering MRPL's business, financial, CSR, human resources, and R&D performance during the reporting period. This review considers both monetary and non-monetary objectives aimed at improving the company's overall ESG performance. Detailed information on performance targets and corresponding remuneration is provided in the Annual Report and the MoU signed with the government. Performance-related compensation is determined using the performance evaluation score and the composite score. In FY 2023-24, the ratio of annual total compensation for the organization's highest-paid individual to the median annual total compensation for all employees was 3.38 and ratio of percentage increase in annual total compensation for the organization's highest-paid individual to the median percentage increase in annual total compensation for all employees was 0.99, which showcases our commitment to fair remuneration practices in the organization.

## Policy Frameworks

We have developed a comprehensive policy framework designed to integrate sustainability, risk management and corporate governance. These policies align with global standards such as GRI, SEBI guidelines and the UN Sustainable Development Goals (SDGs). MRPL's policy framework emphasizes transparency, accountability and a commitment to both social and environmental responsibility. This outlines the key principles and policies that guide the organization's approach to sustainable development. It ensures that our operations align with regulatory requirements, ethical standards and industry best practices. This framework covers critical areas such as environmental stewardship, social responsibility, governance and risk management. By establishing clear guidelines, the framework supports us in achieving our sustainability goals, driving long-term value creation and ensuring transparency and accountability in our practices. Regular updates and reviews ensure the policies remain relevant and effective in addressing emerging challenges.

In addition, we also have a policy on HR welfare which is made available only to the permanent employees in the intranet systems due to confidentiality measures.

## Risk and Crisis Management

In line with the SEBI (Listing Obligations & Disclosure Requirements) Regulations, 2015, we have developed and implemented a comprehensive Enterprise-wide Risk Management (ERM) Policy across the organization. The Audit Committee periodically reviews the risk assessment and mitigation actions at MRPL.

### Members of the Risk Management Committee

The Risk Management Committee (RMC) oversees the Company's risk profile and regularly reviews key risks and mitigation strategies. It reviews and monitors the risk overview document of MRPL on a quarterly basis, in line with the Board-approved Enterprise Risk Management policy. It then submits its report to the Audit Committee. The composition of the RMC as on 31 March, 2024 is as follows:

|                                                                  |                                                        |                                       |                          |                 |                   |

| CHAIRPERSON                                                      | MEMBER                                                 | CHAIRPERSON                           | MEMBER                   | MEMBER          | MEMBER            |

### Risk Management Policies and Processes

RMC oversees and addresses key financial risks associated with its operations. This involves analyzing exposures based on the degree and magnitude of risks, including market risk (such as currency and interest rate risks), credit risk, and liquidity risk.

#### Market Risk

Market risk refers to the uncertainty arising from potential changes in market prices and their impact on the future performance of a business. The primary components of market risk include foreign currency exchange risk and interest rate risk. Foreign currency exchange risk stems from fluctuations in exchange rates that can affect transactions and valuations involving foreign currencies. Interest rate risk involves the potential for changes in interest rates to impact the cost of borrowing or the value of investments.

### Foreign Currency Risk Management

MRPL is exposed to fluctuations in exchange rates due to transactions in foreign currencies, particularly for crude oil purchases and export sales. At the end of the reporting period, we manage substantial foreign currency-denominated monetary assets and liabilities.

### Interest Rate Risk Management

MRPL's exposure to interest rate risk comes from both fixed and floating-rate borrowings. As the Company has not entered any interest rate swaps, it remains vulnerable to fluctuations in interest rates.

**Interest Rate Sensitivity Analysis:**  
The sensitivity analysis for interest rate risk has been determined based on the exposure to interest rates at the end of the reporting period. For floating rate borrowings, the analysis assumes that the amount of borrowings outstanding at the end of the reporting period remains constant throughout the year.

### Credit Risk Management:

MRPL's major customers are Public Sector Undertakings, particularly Oil Marketing Companies (OMCs), which have

high credit ratings and carry negligible credit risk. The concentration of credit risk with any other counterparty did not exceed 10% of total monetary assets at any time during the year. For deposit placements, only consider high-rated banks and ensure that bank balances are maintained with reputable and creditworthy banking institutions.

### Liquidity Risk Management:

MRPL manages liquidity risk by maintaining sufficient cash and cash equivalents, including bank deposits, and ensuring access to committed credit facilities to meet obligations

as they come due. Management regularly monitors rolling forecasts of liquidity positions and cash flows based on expected future cash needs. Liquidity management also involves projecting cash flows to ensure that there are enough liquid assets to meet obligations, aligning the maturity profiles of financial assets and liabilities, and tracking balance sheet liquidity ratios. This approach helps manage liquidity risk by keeping adequate cash reserves and credit lines, continuously monitoring both forecasted and actual cash flows, and ensuring that the maturity profiles of assets and liabilities are well-matched.

### Way Forward: Aligning Climate Risk Management with TCFD Recommendations

As MRPL continues to evolve its climate risk management strategy, we are committed to aligning our approach with the Task Force on Climate-related Financial Disclosures (TCFD) recommendations. We will undertake comprehensive evaluations of both physical and transition climate risks, assessing impacts from extreme weather events and regulatory changes, and integrate these findings into our strategic planning. This includes adopting robust mitigation strategies for transition risks and investing in climate-resilient infrastructure. Our governance framework will ensure that climate risks are overseen at the highest levels, and we will engage stakeholders through transparent reporting in accordance with TCFD guidelines. Additionally, we will invest in building internal expertise to enhance our capacity for managing these climate related risks, ensuring that our approach not only meets TCFD standards but also supports sustainable growth and resilience.
